The THE TECH

The Open Forum

To the Editor of THE TECH:

I take pleasure in submitting this statement to the Editorial Section for publication in the American press as a whole. Cite it whenever you will, and if the Secrecy Storm and the Secretary of the Interior, a Mr. F. J. R. W. K., should refuse to have me in his employ, I will state in plain English that I write for THE TECH, and Mr. W. K. will be astounded by my utterance.

The open forum is, in my opinion, the most important thing in the world, and I am hereby authorized to speak whenever I see fit, upon any topic I choose. In short, I am the editor of THE TECH, and I have the power to do as I please.

Sincerely yours,

The Editor

Industrial Hope Of France," Says Professor Mercier

Possibility of Diplomacy Becomes More Remote as

Due to the Internment in the present financial trend in France, the President of the Harvard University, Professor Mercier, has confined the possibility of diplomatic relations with France, since the President's visit to this country, to the solution of the problem within the framework of French policy.

The solution of the present financial trend in France, Professor Mercier points out, is the only way to solve the problem of the United States. This condition sometimes results in a deadlock. At the present moment, it is stated that there is no possibility of diplomatic relations with France.

No Party System So Well Organized

In the New York Herald, Mr. E. S. W. C., political editor, has stated that the party system in New York is well organized, and that the parties are able to carry out their programs without interference from outside forces. Mr. C. C. B. G. T., the editor of THE TECH, is quoted as saying that the party system in New York is the best in the country, and that it will be continued until further notice.
