The Dorm Goblin Returns to Hide in Basement

Tractor Needed to Remove the Ford Touring Car From Cellar of '93

Again the Dorm Goblin has been playing games with the inhabitants of the Technology Dormitories. This time he had placed the Ford Touring Car in the cellar of the dormitory. It is a large car, capable of accommodating about six students, and was left behind by the students when they left for the holidays. The students had tried to remove it, but were unable to lift it off the ground. They had then decided to leave it there until they could think of a solution.

传染病

The Dorm Goblin is known for his mischievous behavior, and it is not uncommon for him to cause problems for the students. This time, however, he has gone too far. The students are now forced to find a way to remove the car from the cellar, which is not an easy task. They have asked for the help of a tractor, but even that may not be enough to lift the car out of the cellar.

RADIO TOPIC OF POPULAR LECTURE
