CABINET AND BOARD OF T. C. A. TO MEET

For the first time in the history of the Technology Christian Association, the Advisory Board and the cabinet will hold a joint meeting to discuss the progress of the work of the Association, and to lay out plans for the future. This will take place tomorrow evening at six o'clock in the Grill Room of the Tech.

The definite program has been laid out for the meeting, except that the President of the Board of which Pierce is the chairman, will have an opportunity to interrogate the undergraduate officers on the work accomplished, and conversely, the undergraduate officers, led by John H. Willis, president of the Association, will be able to consult with the Advisory Board on matters with which they have had difficulty. Each Department Director will present a report for last year, and the treasurer will present a statement of the expenditures for the year.

PRESCOTT TO GIVE
SCIENCE LECTURE

Lewis in Food technology, he re-
ports that six food exp-
giments have been developed as ven-
tures of previous grains. It was the
result of a mycelium which was re-
cold, thus containing desirable for-
tures of previous grains. It waa
found that this cell would be grea-
ter in size and the food tech-
ics of the previous grains. It was

Solar Power at the meeting of the American Society of Military Engineers. Mr. Adams, who has had some time a size of a small electron beam of light produced by a small mercury arc, had already demonstrated the universe of the beam of light.

In brief, the demonstration consisted of the transmission of music produced by a small mercury arc, and the beam of light, had already demonstrated the presence of the beam of light.

Photoelectric Cell is Receiver. This beam of light was directed toward the window of a photoelectric cell, which, when illuminated, will reproduce the sound as received by the radio set.

T.C.A. HANDBOOK HAS CHANGES IN EDITORS

Norman C. Parsons '28, has recently been elected to the position of Managing Editor of the T. C. A. Handbook. It has been announced by Wallace M. Rice, General Secretary of the Technology Christian Association, that there are still openings for fresh men and a few upperclassmen in the business and editorial departments of the handbook, and all interested are invited to apply to the T. C. A. office.

ROAD REPAIRING TO PROCEED THIS SPRING

Bids will be asked next week for road repairing this spring. Gravel with a tar binder will be used in patching the roads. The Technology Christian Association will carry on the road repairs.
