GEODETIC STATION PLANS ANNOUNCED BY PRESIDENT

Camp Technology Will Be Site Of Station—Work Starts
This Summer

TO INSTALL SEISMOGRAPH

New Device Will Be Radically Different From Older

Prints for a seismograph and geodetic station equipped with the new apparatus for studying earthquake activity and readjustments in the crust have been announced by President Samuel W. Stetson, Jr.

The entire operation will be in the Civil Engineering department, and the location of the station has been selected on the grounds of the seismograph, as the station will be used for several years and is within a short distance of the Massachusetts Institute of Technology.

The seismograph will be installed in the basement of the Chemistry building and will be connected with the geodetic station. The seismograph will be the only one of its kind in the country and its isolation from the main body of the building will be an advantage.

It will be the only automatic instrument for this purpose at the Massachusetts Institute of Technology.

Professor Stetson said: "The seismograph will be the first automatic instrument of its kind for the purpose of locating earthquakes and the seismograph will be the only one of its kind in the country and its isolation from the main body of the building will be an advantage for this purpose."

WALKER WAITERS ARE TAUGHT TO SERVE

Printed instructions telling how to serve and what to say to customers in the Palmer Dining Room have been posted on all the walls of the room.

The instruction booklets, which have been compiled by the Palmer Dining Room staff, will be used by all waiters and waitresses in the room.

"All waiters and waitresses are required to read the booklets," said Miss Mary S. Walker, manager of the Palmer Dining Room.

"We have found that the booklets are very helpful in training our personnel. The booklets tell the waiters and waitresses what to say and how to serve customers.

A very special rate of $2 each for each banquet will be charged to employees who are having house parties during the coming year. The usual rate for employees who are not having house parties will be $3.

This was the first of the annual event. The luncheon was followed by the junior prom, which is held every year during the coming year. The usual rate for employees who are not having house parties will be $3.
