Coaching: Haines puts crews on River

Eights Get Out of Work for First Time

Open water enabled crew candidates to get out on the river for the first time last week. The Harvard crew, the senior Varsity, and several Varsity candidates took a workout on the river. About seventy or eighty men were at work, and low that warm weather is becoming more common, it is expected that this number will become more and more of a regularity. The candidates have been picked, and so far the varieties of handwork in the shells. The number of frosh who are showing ability is between forty and fifty.

The most promised Varsity candidate include Mearns and Moore of last year's Junior Varsity, Delman, from last year's fresh crew, Senior, another former J. W. McGuinness, a fine College crew who have never before been in the races but possesses a good deal of natural ability. Collins, of the 1925 Varsity, Knight, of the 1926 Varsity, Sarver, 1926 Fresh, Harnett, the international of 1925, and Ball, a sophomore centerman last year.

The first test comes in the first practice meet of the season this year, for the Crimson men have had a chance to work on this river this week. The only place to easily accessible is about a half or three quarters of a mile up the river, and even here there is not a very great cleared space.

It seems to be the favorite pastime of Santa Claus to break the show pole vault record. On Monday night a New York A. C. games was held over the bar to a height of 13 feet 9 1/2 inches. This mark bettered his old mark set last week in dozens of feet, 1 1/2, and last year's record of 13 feet 3 inches by Charles Scott, the Norwegian star. 

That Yale hockey team is certainly getting a fast pace for the other clubs to follow. Their last achievement was the winning of a East Wil- liams set 75. Captain Lacy No- berg says of course the unexciting game of last year was a result of the unusual talent of their competitors. The emphasis on natural ability is in line, however, in the playing of the game rather than the wanting of it. The fact that athletics are not conducted primarily for publicity purposes makes it possible, in largest measure, to carry out this program.

The second chief objective is to engender in the individual student a love of sport and a belief in, and adherence to the simple rules of clean sportsmanship, and to develop judgment, character and independence of thought and action, tempering thereby the sense of laissez faire. Finances are in the hands of the student body, who are to have the responsibility of the student body are to have the sense of responsibility. Finances are in the hands of the student body, who are to have the responsibility of the student body are to have the sense of responsibility.

Here on Saturday

Coach Hedlund's Squad Ready

For Opening Games on Saturday

On Saturday afternoon the first dual track meet of the 1927 Technological season will take place when the Engineers meet with Northeastern University on the Board track. For the first time in several years the Boston Avenue School is putting out a really good team, with the result that Saturday's encounter will be well contested.

Coach Hedlund's wrestling handicap meets have done much to build up the Cardinal and Star squad and give the men the necessary confidence to go into a meet and win. According to previous agreement the relay teams of the two schools will not compete.

Technology will enter the meet with some excellent chances for first places in most of the running events. Pete Bower seems certain to hold his position in the mile. While Ken Smith, holder of the Board track record for the eight furlongs, will show his skill in that event.

EstABLISHING new records, Tuxedo Photographer has soared over the bar to a height of 13 feet 9 1/2 inches. The second attempt was a failure, for the bar was broken in two pieces. Hence William's has defeated Dartmouth and the old forced Harvard to the limit to win.

The famous tenor had just started to sing, when I started to cough. Everybody grinned and I felt like a cookey. Next day I switched to Old Gold Cigarettes. There's no cough in a carload. Nor a throat-scratch in a store-full.
