Student Branch
Of A. I. E. E. to Convene In May

Special Technical Session To Be Entirely For the Student Branches

In continuation with the National Convention of the American Institute of Electrical Engineers to be held in Pittsfield, Massachusetts, May 30, 31, and June 1, a Technical Session held by the Student Branches of this organization will be a continuation of the Student Branches of this organization.

The Technical Session on Friday afternoon will consist of papers which are largely for the students. It is planned to have more than two papers, and probably five or six if time permits. All papers will be read by a proxy. The paper will be announced after the preliminary exercises in the form of a notice being sent to the students. It is planned to have a Technical Session on Friday afternoon which will be entirely for the students. It is planned to have more than two papers, and probably five or six if time permits. FORUM RESULTS IN HEATED DISCUSSION

Superstition, Belief, Faith, Are Subjects of Speech

"Superstition, Belief, Faith, and Work," the subject the subject was taken by Professor Clarence R. Shinn of Yale for the first Tech. A. I. E. E. forum yesterday afternoon in the Parade Dining Room. It also proved the subject of heated discussion afterward.

Superstition, according to Prof. Shinn, is the traditional acceptance of some form of the supernatural, some law, or some statement. He pointed out that there has been superstition in science in the past as well as in religion.

Belief, on the other hand, is the rational acceptance of those same things which, traditionally accepted, are superstitious. There can be only belief through testing, and he said, we must be willing to accept statements of an hypothesis. The only difference between scientific and religious belief, he said, was that the former is objective, the latter subjective.

Add dynamic action to belief and we achieve faith, stated Prof. Shinn. The man who constructed the 336 story building in New York City and believed it, displayed faith that the ends of the building. Next to the new society of leaders, will be Herbert C. Oettinger on March 2.

The University of Washington has advanced the Chinese language to its curriculum.
