FRESHMEN WILL GET SCHOLARSHIP HELP THROUGH ALUMNI

Regional Scholarships Have Been Established In Six Large Cities

FULL TUITION AWARDED

Alumni Distribute Information, Interview Candidates, and Choose Men

As a means of obtaining the co-operation of alumni in assisting fresh- men to obtain scholarships, a new plan for the establishment of regional scholarships has been announced. These scholarships are available to students from all parts of the East who enter or who have entered within the last six months. This plan is sponsored by the Alumni Scholarship Committee of the class of 1900.

At the present time the classes which have already completed all arrangements for regional scholarships are New York, Boston, Philadelphia, Baltimore, and Chicago. Plans to establish similar scholarships in other cities are under consideration.

Frozen Summer Open To Tech Radio Men

Prospects of winning a hot summer in the east of the Arctic region and the same at the same time working at a favorite job, are within reach of the members of the two Technology students for whom boreal summer is the attraction, and who incidently are li- censed radio operators. Word has been received from Capæ of the Electrical Engineer- ing Society that a number of members are interested in entering the open 500-mile international radio contest to be held this summer.

Maine again plans to enter the 19300-kilometer 'Archipelago' class of 10,000 miles, and on the last day of the contest, the radio machine is to be turned over to a known Arctic explorer, who will take the radio north.

Religious Topics To Be Discussed In T. C. A. Talks

Rev. Tweedy Speaks Tomorrow On "Science's Faithful and Ancient Creeds"

"It was by attending Dr. Tweedy's lecture on 'Science's Faithful and Ancient Creeds' that I had my first experience with theism," wrote one of the students who attended the lecture. "This is the subject of Dr. Tweedy's latest book, 'A History of the Bible and the Church.' The lecture was given in the Theo- logical Library of the Tech School on Tuesday, April 2, and was attended by a large audience. The lecture concluded with a discussion of the relationship of science and religion."
