Two Technology Professors Named In Guggenheim Memorial Fellowships

Dr. Philip Franklin and Dr. Manuel Vallarta Will Get Stipends

Dr. Philip Franklin, professor of mathematics at the Institute andDr. Manuel Vallarta, professor of physics, are among the 43 persons named as Guggenheim Memorial Fellows for 1927-28. Each of these professors will receive a stipend of $2500 with which to carry on research and creative work abroad.

Dr. Franklin, who was born in Gutersoy, Germany, and in Zurich, Switzerland, while attending the University of Zurich, will make a study of the electrical equations of waves and their solutions, almost periodic motion, and the connection between Birkhoff's wave mechanics and the Schrödinger equation in relativity, in consultation with Européan scientists.

83 Research Fellowships

A total of $410,000 is being distributed by the Trustees of the John Simon Guggenheim Memorial Foundation. This Foundation was established in 1925 by Senator and Mrs. Guggenheim as a memorial to a son who died on April 24, 1925. The Foundation has a capital fund of $2,100,000, and the gift of Senator and Mrs. Guggenheim is devoted to the award of fellowships to American and foreign scholars and artists who have demonstrated unusual ability for productive scholarship or unusual creative ability.

Fellowships grants for 1927-28 have been awarded to 83 persons. Fifty-five of these fellowships have been appointed by the Trustees, and the recommendations of the Fellows of the Foundation appointed last year have been reported back for action. The new Fellows come from 22 States, and from 29 different educational institutions.

THE ETERNAL BOY IS SUBJECT OF READING

As the last of his readings from famous authors for this semester, Mr. F. B. Copithorne, of the Department of Mathematics, will conduct the last lecture of the afternoon, Tuesday, April 12. Mr. Copithorne will read the opening of the following essay in memory of William Eastman Jr., '17.

In the fourth of the series of Tuesday afternoon readings conducted by the Technology Faculty, Prof. Mather of Harvard will speak on "Science Re-making the World." In the Faculty Dining Room at 4 o'clock tomorrow.

Prof. Mather, who is one of the scientists called for the defense in the famous Scopes trial at Dayton, Tenn., in 1925, is a descendant of that famous Coton Cotton Mather who was such an authority in witchcraft. He studied at Denison and Chicago Universities, receiving a B. S. from the former and a Ph. D degree from the University of London, where he will make a study of inorganic chemistry, in consultation with Européan scientists.

THE TECH

Faculty Decides Upon a New Course IV-I

Students Lacked Necessary Knowledge To Fully Digest Subjects

This year the courses in Architecture have been increased from three to four, and only those students who have attended the first year have been permitted to enter the second year. It has been found that the students have not had sufficient knowledge to handle the subjects, and it has been decided to have a new course for those students who have not taken the first course.

NEWTON HIGH DOWNS FRESHMEN NATATORS

Newtown High School's fast swim team last marched in the Central and Greyhounds 24-18, in the final meet of the year at the Newton Y. M. C. A. pool on Friday afternoon. It was a tight and hot battle all the way with the frosh having slightly the better of the argument up to the final event, the relay, which was won by the froshboys and which incidentally decided the meet.

THE AMERICAN TOBACCO COMPANY

Mass Inst Of Technology Cambridge Mass

When the blue pipe smoker the man who has tried them all and really knows settles down to get the utmost comfort solace and relaxation out of his favorite pipe you will generally discover that he is smoking Blue Boy tobacco.
