WILL SELL SEASON TICKETS TO COVER BASEBALL BUDGET

Drive Starts Today at Noon—Continues Until Monday Afternoon at 5

NEED 12 NEW UNIFORMS

Institution Committees Sanctioned
Plan When Proposed at Last Meeting

Candidates for the Beaver baseball team are tonight being chosen by the members of Technology, beginning this noon, in order to fill vacancies that may be caused by the selling of season tickets. The team is expected to remain in the 12-man organization, but the committee is not in a position to say how many season tickets have been sold.

The Annual Committee on student tickets has set the price of a season ticket at $1.00, the price being $2.00 for a single game ticket.

Senior Weak Blanket Ticket
Cost $8

Senior Week revolvers will be assessed $2 to cover the cost of all the new uniforms for the Senior Prom, according to the Prom Committee. The dance committee will meet tomorrow afternoon to decide the final plans for the Senior Prom.

The Wednesday night dance will be at Somerset Hotel, beginning at 8:30. Tickets will be sold at the door.

G. H. DE THIERRY
TO LECTURE HERE

In Professor of Hydraulics At Technical University at Charlottsburgh

Coming to the United States through the special invitation of President Samuel W. Stratton, George Hynckley de Thierry, Professor of Hydraulics at the Technical University of Charlottsburgh, will lecture here during the second week of April. Professor de Thierry is one of the foremost consulting engineers on the subject in Europe. He arrived here on Wednesday evening to deliver a series of lectures on hydraulic engineering and to be consultant in the layout of the Long Island Dam.

These lectures will depict the work of the French engineers in the research laboratories of Germany and France, and will deal with the most modern moving pictures. The lecture features of the series are scheduled to take place in the President's Room, 2nd floor, Thursday and Friday at 1:00.

Our Silver Fraugicke Newbery.

Although the United States is connected with many hydraulic problems such as the filling in of the Mississippi River and the periodic over-flowing of the same stream both of which create the flood problems of the continent, Germany has been active in building practically every part of the country.

It is with the intention of continuing the series of lectures on hydraulic research laboratory of this type in the near future that Professor de Thierry was invited to Technology. Among the practical hydraulic problems studied by Professor de Thierry are the regulation of the River Weser at Bremen, the New York city water works at Brooklyn, the eastern part of Kentucky, 12 miles inland instead of only 5, due to the development of the Ohio Valley.

The plan of the course is to give the audience to ask questions on any subject brought up by the audience, and to get a general idea of the work of the hydraulic engineers in various parts of the world. The first lecture will be given on Wednesday evening, beginning at 8:30 at the President's Room.

ABOLITION OF ANNUAL CIRCUS IS RECOMMENDED BY INSTITUTE COMMITTEE

Chairman of the annual Circus committee is in favor of discontinuing the annual activity for next year.

An annual Circus Committee of 15 members will be appointed this spring by the Institute Committee. The committee will be charged with the duty of planning the annual Circus.

After a successful season, the annual Circus was postponed for the next year. The annual Circus was held at the end of June and was attended by thousands of people. The committee is considering the possibility of turning the annual celebration into a permanent Institute event.

The last series of Circus activities which took place in regard to the Circus it will be available for sale at $10.00 to $15.00 each, and have been more and more each year. The Institute Committee is hoping to cover all expenses of this event by raising the money needed from different sources such as by selling tickets or by donating money to the Institute.

The committee has given a complete list of the available tickets to the members of the Institute Committee. It is recommended that the Institute Committee Sanctioned the activity in favor of discontinuing the annual Circus activities next year.
