gas grenades, incendiary grenades, smoke grenades, and candles. The poisonous gases will be especially in- 
dispersion of gas clouds. The demonstration showing chemical warfare pro- 
ducts on a real scale will begin bet- 
 tween Walker and Building 2. Two 
hundred-yard mortar fire from four 
huckers mortars will be set off on the 
field. After the smoke from these has not 
fully obscured the landscape, a se- 
crop smoke screen in his wake, probably from 
rhinod tetraethylide, will be set off in 
the direction to permit the con- 
trolling off flares and will have machines 
ready for running smoke screens.

Today the freshman Chemical War- 
face Unit will be organized and that 
will be given an opportunity to start 
training at once if their desire to take 
part in the demonstration on Open 
House afternoon and evening. They 
will not be obliged to do so, and vol- 
unteers only will be asked for, but if it 
indicates their intention to participate the num- 
er of members must be kept 
down, as each mortar requires two men to man it.

BASEBALL DIAMONDS ARE RECONDITIONED

Considerable attention has been at- 
tracted during the past few days by the signs of activity on the space 
between Building 2 and Walker. The 
baseball diamonds have been 
hung and the ground riled to take out 
the rut left there during the winter, 
the motor cars.

Temporarily a backstop has been 
erected on the diamond near the 
basement but it will be removed be- 
after graduation, due to the fact that 
it is not deemed entirely ornamental. 
Another diamond is being prepared 
off the field behind the Cooperative 
store, which is expected to be ready 
by Sunday.

Technology's tennis courts, which 
have been in use for several weeks, 
are continually in use.

Smith expressed the belief that twice 
as many courts could be used if they 
were available.
