DEVELOPED POWER SITES
Has Done Work in Both Italy And
American Business Man
Mr. J. R. Aldred has been selected to address the graduating class at the continuous education institute of the University of Texas, where he is a graduate of the law school and is a member of the faculty. He will deliver the commencement address on June 1, 1937.

The University of Texas is one of the larger universities in the United States and is located in Austin, Texas. It is the flagship institution of the University of Texas System and is a public research university.

Mr. Aldred is a well-known businessman and has been active in the development of power sites in both Italy and the United States. He has been instrumental in the development of several major power projects, including the construction of a hydroelectric dam on the Susquehanna River at McCall Ferry. As an outgrowth of this project, a power plant on the Susquehanna River has been constructed, which now generates electricity for residents of the surrounding area.

Mr. Aldred is also involved in the chemical industries. He received his degree in chemical engineering from the Massachusetts Institute of Technology in 1922 and has worked in various capacities in the chemical industry, including as a consultant to several major companies.

Mr. Aldred is a member of several professional organizations, including the American Chemical Society and the Institute of Electrical and Electronics Engineers. He has served as a member of the board of directors of several companies and has also been involved in various community and charitable activities.

Mr. Aldred is a native of New York City and has been a resident of Austin for many years. He is married and has three children.
