Distinguished by a favor that places it first

In a natural pride that Camel feels for its triumphs. Not only did it lead the field shortly after its introduction. It passed steadily on with each succeeding year until today it holds a place in public favor higher than any other smoke ever reached. Camel is supreme with modern smokers.

Obviously, there is a quality here that particular smokers appreciate. It is indeed the myriad qualities of perfection that are to be found in the chested tobaccos grown. And the art of Nature is aided by a blending that unfolds each delicate taste and fragrance. You will find a solace in them every smoking hour. Their mildness and mellowness are an endless pleasure.

"Have a Camel!"
