Institute Power Plant Is Model of Efficiency in Design and Operation

**COURSE VI WILL HOLD SERIES OF COLLOQUIA**

(Continued from Page 13)

Intervals of one week, the next one coming on December 21 and 22, when Mr. W. O. Douple, M. E., will present a paper on "Mechanical Problems." Thus the colloquia will cover all the points at one sitting in connection with large power plants. Separate notices will be posted on the Institute bulletin boards for each colloquium, and it is requested that members cover the bulletin board on their way to and from the Institute to see these notices.

**STOW MOWIES OF COURT**

Mr. R. W. Owens, will talk on "Institute bulletin boards to advertise connection with large power plants. With these reports the members are invited to cover the bulletin board on their way to and from the Institute to see these notices.

**SHOW MOVIES OF LARGEST COPPER MINE**

Mr. W. B. D. Motter, vice-president of the Chili Exploration Co., will speak at a meeting of the Committee on Recreational Promoting Students, at three o'clock this afternoon. Mr. Motter will speak to the Committee on the present educational conditions in Chili. Considerably interested this afternoon he will exhibit a unique set of moving pictures showing the all-directional processes to copper mining at the Chuquicamata Mine, the largest copper mine the world. All ungraduates and seniors are invited to view these pictures.

**SHH-H! THE YOUNG LADY**

Whose back is toward you, has just told the young man that she will cancel a previous date any time he is late. The smartest place to dine and be seen is the popular "Shh-h!" The Young Lady. Young women and girls love it because it is located in the most fashionable section of the city. No more "night school" for them!"
