cial Tomorrow to Include Works of Franck, Handel

WO MUSICIANS TO ASSIST

Third of Series of Five Concerts Provided For Student Body

Music lovers among Technology's student body will have the opportunity of this school year to hear a series of five concerts with the finest artists of today. The program will open with a recital by two world renowned cellists, followed by another concert featuring the well-known composer, Handel. The last concert will be a special one, with the famous composer, Franck, being the central figure. Tickets can be purchased from the Box Office, located in the basement of the Student Union. The concerts will take place every Monday at 8:30 PM, in the Student Union's main auditorium. The first concert begins with works of Bach and Handel, followed by the second concert featuring Mozart and Beethoven. The third concert will feature the works of Chopin and Schumann, while the fourth will showcase the works of Brahms and Tchaikovsky. The final concert will be a tribute to the works of Debussy and Ravel.

RADIO ASSOCIATION ENTERED IN TESTS

Communicate With Many Foreign Stations During Week

The Radio Society is now participating in the tests that are being carried out under the auspices of the American Radio Relay League in connection with the international radio test of the country and of foreign countries. According to the latest reports, several stations have been in contact with each other in the past week, the society has been in touch with stations in the following countries: New York, Philadelphia, and Baltimore. Judging from the reports, the intensity of the received signals from the Societies Station, XNV is very good. The members of the society have made every effort to win the tests.

In Ypsilanti, Michigan, the station at the station of present consists of a 40 meter and a 20 meter set. The 20 meter set, which has just been installed, is used during the daytime. This set consists of a 20 meter set, which has just been installed, is used during the daytime. This set consists of a 20 meter set, which has just been installed, is used during the daytime. T E N O P E N S J U N I O R BOARD COMPETITION

Due to a vacancy Tycon Engineering, the leading producer of radio equipment, has been asked to conduct the competition for the position of principal manager. It is a well-known fact that Tycon possesses one of the finest laboratories in the world and is open to any Sophia student who wishes to enter. The competition will be held on the last day of the school year, and all students who wish to enter should do so as soon as possible. The competition will take place in three rounds, with the first round being held in the Main Lobby, the second round in the Sanders Theatre, and the third round in the Little Theatre. The prizes for the winners will include a trip to New York City, a trip to Washington, D.C., and a trip to Los Angeles. The competition will be judged by a panel of experts, including Professors Tien and Maclean of the Department of Electrical Engineering. The winners will be announced on the last day of the school year, and the prizes will be presented at a special ceremony in the Main Lobby. The competition will be open to all students who are enrolled in the Electrical Engineering program at the time of the competition, and all students who wish to enter should do so as soon as possible.
