ROBERT RIDGWAY TELLS ABOUT NEW YORK CITY SUBWAY

New York's traffic problem is eased by the fact that the newly constructed subway system has been opened. At the same time, Mr. Robert Ridgway, Chief Engineer of the Board of Transportation of the City of New York, has stated that the system will be expanded in the near future.

Although the city has a number of subways already in operation, the new system is expected to handle traffic three times as much as all existing subways combined. The system will also provide a means of transportation for the thousands of commuters who rely on subways for their daily commute.

BASKETBALL TEAM DEFeated BY PROVIDENCE COLLEGE

The basketball team of the University of New York was defeated by the Providence College team on Friday, February 17. The final score was 26-21, with Providence leading throughout.

New York grad Club plans to Move To New Uptown Location This Spring

The New York grad Club is planning to move to a new location in the spring. The current location is too small and outdated, and the club is looking for a new space to accommodate its growing membership.

The club is currently considering several options, including a new building and a lease on a new space. The club will announce its final decision in the near future.

Spring break for P.E. courses

The spring break for P.E. courses is scheduled for March 14-18. This break will give students the opportunity to travel and explore during the spring semester.

The break will start on Monday, March 14, and end on Friday, March 18. Students are encouraged to take advantage of this break to engage in outdoor activities and to enjoy the warmer weather.
