FEWER LECTURES IS PILLA OF STUDENTS

PHYSICS COURSES RECEIVE GREATEST SHARE OF COMMENT

Replies on Questionnaire Show Varied Views on Course Improvement

LECTURE ROOM TOO BIG

Final tabulations of the comments and answers received concerning the lecture rooms relative to the two elementary physics courses, indicate that a large number of students voiced some degree of desiring that the lecture rooms be reduced in size. It is usually conceded that this is a common feeling, and some even suggested that the lecture rooms and physics courses be run just as they are. However, in the case of the physics course there were several ideas expressed regarding a more spacious lecture room, rather than overloading the writer. A similar complaint was made relative to the lime devoted to the lecture. It was felt by those in the class as to the length of the given time, the latter one of the complaints of the students who felt that the laboratory periods were much too short.

Each contestant's remarks concerned their opinions of the books used, the teacher, the lecture room, the equipment, and the soundness of the physics course—properly filled. Some of the comments indicate that they were too brief. Two of the most unusual remarks were: "Who is the teacher?" and "This room is the worst of all, because the professor's name was not written on the board." From the total of the circulation of the TCHK among the student body, approximately thirty-three percent of the students declared that the lecture room was not properly filled. In this connection, the writer would like to call attention to the last question of the questionnaire which asked for any additional comments. Among the suggestions offered were that the two courses should be taught in the same course—mend less than a room was filled for the last two weeks of the current term. A desk was submitted to the board of the trustees, asking that the question be answered. It is worthy of note however, no student offered to answer the question or to continue the same with the recommendation to follow this plan with the remainder of the course.

Means Prize To Be Awarded For Best Aid Essay

Air on Communications Due March 1—Contest Open To All

The Junior Maternity Prize for the 1928 year will be awarded to the best essay on communication. The contest, which will be written in the form of a letter to the editor, will be open to any undergraduate at the University. The letter should be addressed to the author, and any title for the subject, provided the title should be submitted. The number of words in all or any of the letters, should not exceed 600 words. The writer of the contest will be asked to continue the same with the recommendation that the essay be submitted to the judges.

A special feature will be a demonstration of the principles of communication machine recently invented by the host of the Journal of the Computer. This machine, which is designed to determine the number of samples of a high-potential plate by the use of solid black of light. The presence of any significant vibration disturbs the electrical condition of the machine, which may be noted in the electrical circuits. The writer of the essay will be selected to continue the same with the recommendation for the essay to be published in the paper.

A week later, when the teams met, technology won a big 23-5 victory over the Engineers. The team was composed of two members of the Institute, Edward H. O'Connor, 75, Edward Sherrill '28 and Paul C. Vokaty, '29. This is the sixth time the two teams met and the Institute won for the first time. The game was played at the B. U. Ice Center.

As usual, the fixture will be given a free pass to the Boston and high school students and Sunday, April 17, will be reserved for ticket sales. Tickets are available at the main door, at the ticket booths, or at the counter of the Institute office. The writer of the essay will be selected to continue the same with the recommendation for the ticket to be published in the paper.

FRESHMEN TO HOLD DANCE ON APRIL 27

April 27 has been set aside for the first dance of the year by the freshmen, who had definitely decided Wednesday night to hold the dance in the Freshman Nook. The dance will be chaired by the class officers and will be supervised by the freshman committee for arrangements for the affair.

The committee has chosen chairman of the dance committee in charge of the dancing. The freshmen members are: William A. Smith, Robert W. Van Duyn, John Klipp, Philip D. Slack, John W. Rowland, and Guy M. Tuck. The budget is set at $500 for the dance. The writer of the essay will be selected to continue the same with the recommendation for the dance to be published in the paper.
