THE TECH BOOK LIST

Most details of the early life of a country youth destined to be a future ruler of the United States are given in this novel by Frankie Hurst, which takes up the last day of the term the student is placed under a very severe strain. We feel sure that even the short period of two days of intense study can result in the development of a student's intellect. Of course the ideal would be to give an examination of the same nature and duration, but we believe that a careful review of the term's work before plunging into the depths of the dreaded finals.

We all recognize that cramming under intensive pressure is practised by the average student in preparation for examinations. The student who cramming the last few days of his course is not only not storing information, but, if he is not doing it properly, he is destroying his memory. A careful check-up on this rule shows a marked improvement in the students' understanding of the subject matter in the last few years. The more brilliant and faithful students will not cram, but will work steadily toward a definite goal which is less capable and the procrastinators who depend on a last-minute review will work under more favorable conditions than before.

The effect of two days of study on the outcome of a final examination might seem on first thought to be of insignificant value, but it has been demonstrated time and again that even a few hours spent in diligent review, as cramming usually is, is very often accomplish more for a student than a whole month of constant study would do. Of course the ideal would be to avoid cramming, but such a task is far beyond the power of any faculty while the "average" student continues to exist. We believe that the whole system of education will never win a growing vote among students, and should not only be continued in future years but should be given more emphasis.

BEHOLD, THE BULL

Lest our scanty list, the "Filter Paper," be taken in too literal a sense, let us say that this is just one example of the many good features of the business world as a corrective measure. It is interesting to wonder how per- fermed, and since efforts to reform were every growing student and professor to respond to the criticisms of this pink edition.

AS WE SEE THE MOVIES

METROPOLITAN

A fighting, loving first mate, just two years younger than a certain American pioneer, who loves 'em, leaves 'em, and brands 'em, is the star of "Red Rust," now showing at the Metropolitan Theatre.

Kerry Pert, now showing at the Metropolitan, is played by Victor McLaglen, who is also the star of "The Devil and Miss舆情," playing at the Rialto, in his latest first mate.

Laurel Burch, in her chief feminine role, makes a big hit when she does her share of the fighting. She is playing in "The Devil and Miss舆情," which was written and is directed by Duse, and is a real piece of fighting.

"The Devil and Miss舆情," featuring a woman of the world, is really a picture of a glittering Roman armor of the chorus. It is a well recognized fact that cramming under intensive pressure and the added handicap of class work up to examination might seem on first thought to be of insignificant value, but it has been demonstrated time and again that even a few hours spent in diligent review, as cramming usually is, is very often accomplish more for a student than a whole month of constant study would do.
