Reparis Under Way on Four of Tennis Courts

An entirely new drainage system is being installed in the four tennis courts on the east side of Walker Memorial. The objective of this work is to ensure that the courts will be in hard court surface by the early summer, making them suitable for hard court play at Technology. At present, it is difficult to tell accurately when they will be ready for use, but they should be ready soon as conditions permit.

The Leopards rename it Flurin to take over captaincy.
