Year '28 Has Produced Many Famous Exponents of Science and the Arts

Goldsmith, Bunyan, Schubert
Listed as Hall of Fame Of '28 Alumni

The Class of '28, graduating this year, has the largest alumni association in its "World's Currents" of any, according to the New York Times. Many of the graduates are now opening up the frontiers of science and the arts.

Aquatint Caption to Foley and John Bunyan, Schubert, of the Class of '28, has been honored as an exclamation of the Class of '28. The Class of '28 is the largest in the history of the university, and its members are considered to be the most outstanding in the university's history.

Among other things, the Class of '28 has given the world more members of the National Academy of Sciences, and more members of the American Philosophical Society, than any other class in the history of the university.

CHEMICAL WARFARE IS T. F. P. FEATURE

An interesting article is "The Chemical Warfare of the 20th Century," which is a study of the uses and effects of chemical warfare in modern wars. The article is written by a member of the faculty of the University of Chicago, and is published in the "Science Weekly." The article is accompanied by a series of photographs that illustrate the effects of chemical warfare on human beings. The article is a valuable contribution to the study of modern war, and is a must for every student of military history.

Medical Students At Oxford Fare Well, Is Claim

Rhodes Scholarships Open To American Students—Amount To $6000

"Although few students seem to have considered the possibility of gaining an Oxford education through the Rhodes Scholarship, there are a number of students applying for the Rhodes Scholarship in the United States," according to a recent 1928 report.

The report states that there are many advantages to studying at Oxford, including the opportunity to study under some of the best minds in the world. The report also notes that the Rhodes Scholarship is a competitive one, and that there are strict requirements for eligibility.

Of special interest to the students of the University of Chicago is the description of the work that is done in collaboration with Professor F. G. Busch at the University of Chicago. "The work is highly satisfactory," according to the report, "and it is an honor to be associated with Professor Busch in his work.

There have been some difficulty with the admissions of students from the United States, but this is due to the fact that the University of Chicago has a large international student body. However, the University of Chicago is now making efforts to attract more students from the United States, and it is expected that this will be accomplished soon.

The report also points out that the University of Chicago has a number of excellent facilities for the study of medicine, and that the University of Chicago is now making great efforts to attract more students from the United States.

"There are many advantages to studying at Oxford, including the opportunity to study under some of the best minds in the world. The report also notes that the Rhodes Scholarship is a competitive one, and that there are strict requirements for eligibility."
