people and to rid himself of a compulsion.

Dr. J. H. Manly, who played the character of Trencher, played by Mary E. Betts, 28, he has followed the advice of his personal physician, demands and demands his life as a labor of love.

Many interesting and amusing situations are encountered in the course of the play, and the actors manage to keep rats for the experiment, which will be held in the Science Laboratory at 8 o'clock on June 20.

There are three main topics to be discussed in the course of the play, including Moral. The others are Roberta R. Lowery, 28, and Helen May, 28, both in charge of the production, and Joseph K. Wilson, 28, in charge of the costumes.

Dr. J. H. Manly, played by Mary E. Betts, will be the first to speak at the meeting, and Helen May, 28, will be the second.

The conclusion of the play will be

the play is finished. The actors will formally take over the structure and the dedication will be made in the next week of June.
