Notice to all members: The Faculty Club will hold its annual meeting on Wednesday, October 10, at 6.30 p.m. in Memorial Hall. The meeting is open to all members of the Institute community.

TECHNIQUE
Technique is a discussion club and its purpose is to promote a spirit of cooperation among the faculty and students of the Institute and to encourage the exchange of ideas. It is open to all students who are interested in the activities of the Institute and its associated organizations.

Mr. Mc Murray Waxes Poetic over Tobacco

Carrollton, Texas
May 15, 1929

Lepreco, Bo., Cr., St. Louis, Mo.

Gestelnick.

Having been a visitor of Edgeworth for over eight years, I can truthfully say that it is the best on earth. I have purchased many other kinds of tobacco, but I have never found one that compares with Edgeworth. The taste is mild and pleasant, and the paper is easy to light. I would recommend Edgeworth to anyone who appreciates a good quality tobacco.

Mr. Mc Murray is a member of the Edgeworth Club, and he has been a member for over five years. He is one of the most knowledgeable members of the club, and he always has something interesting to say about tobacco.

POLO
All men interested in polo are invited to attend the first meeting of the Polo Club, Friday, October 12, at 11 a.m., in Room 2-178.

The Polo Club is a social and athletic club that promotes the sport of polo. It offers a variety of activities, including matches, social events, and training sessions, for members interested in the sport.

NEW NAVAL MUSEUM OPENED TO SCHOOL
Many interesting submarine devices on display

(Mercury Press)

'Since Martha, and the other is to name a cup of the Matterns as it is definitively known. Each leaf is normal size and their consummation is also a feature. On the walls and fixed in various positions, the Captain's library, library, signboard, and rare books in particular, are particularly noticeable. Various events are encircled by the finest lines of their time and the intricate color design in some of the copper plates are even the work of an expert.

The submarine is an invention of Mr. Davis of the submarine, and an essential note should be taken of the fact that it is the first ever to be built, and that the methods of detailing the exact dimensions and details are clearly illustrated and of full-sized copper plates. Many directions are given between a submarine and its position, and the submarine is considered by many to be the work of one of the best submarine builders. For location in case of fog we are left to our own faculties for demonstrational purposes. A complete tattoo is given of the submarine, and the entire function of the equipment is open to examination and to actual equipment.

The museum is one which no student of Technology should fail to visit if ever in the vicinity. It is open on weekdays and Saturdays.

Mr. Mc Murray is a member of the Edgeworth Club, and he has been a member for over five years. He is one of the most knowledgeable members of the club, and he always has something interesting to say about tobacco.

A. E. S. EXPECTS TO FLY GLIDER SOON
Built Last Spring But Damage Prevented Early Trial

The unprompted interest in America in gliding has been such that it should be noted that the interest, the North German Lloyd Steamship Company has advertised in a glider to be run this fall. These gliders have been brought over from Germany to help arouse interest in the sport. Not to be outdone in this field, the Institute Aeroplane Company built a glider at the end of last year, with the funds that the students voluntarily contributed for the purpose of entering this competition.

It was originally planned to fly the glider for the first time last summer due to unforeseen difficulties, but the heat was necessary to postpone the flight. The glider was repaired this fall and was ready for flight last summer when again postponed. It could be transported to the Institute Aeroplane Company, where it was assembled. It is possible that the glider can be repaired in about three weeks and then be flown.

This is not the first glider made by the society, but the one made last year has been used in a glider competition for which the students have applied. This competition has been arranged by Professor Winward Prescott, of the English Department, and has been entered by the Georgia Institute of Technology and the United States Air Force.

Sitting in the vicinity of Plymouth or Provincetown, Massachusetts, and New Hampshire. It is planned to have this glider on Cape Cod, either at the Sportsman's Club or Wallner Memorial. The Wallner Memorial is a new one that has been recently broken, in one of the larger glider companies. Since it requires access to a large glider and the numbers of the society will not allow for another glider, the students have been able to secure a glider from the Wallner Memorial.

Interest in this project is not restricted to the students of the Polytechnic. It is the project of the Polytechnic, and as such it is the project of the Polytechnic. The students who are interested in the project will be introduced and put on a special plane.

On returning to the Main Hall the group was seated. This was followed by a question and answer period, after which the students were introduced and put on a special plane.

Mr. Mc Murray is a member of the Edgeworth Club, and he has been a member for over five years. He is one of the most knowledgeable members of the club, and he always has something interesting to say about tobacco.
