STEEL TALK GIVEN BY DR. HATFIELD

Corrosive Tests and Ingest Size
Included in Lecture to Students

(Continued from Page One)

During the last four to five years, 50,000 units were in the laboratories in connection with rust and acid resistant steels. It is true that all research institutions should maintain museums. A difference of a few years allows problems to be solved for which there were no fo-

cil, a discussion of the work had been started by the following speakers will lecture before the class in Business Management in Room 1-190:
