Professor Peter Schwab Lauded for Work at M.I.T. by Resolution

At this month's meeting of the faculty held November 21 the main address was made by Professor Charles F. Taylor in his usual stimulating manner. He told the faculty of his visits to the research laboratories all over Europe and compared their methods with those which existed here in the latest internal combustion engines, locomotives and automobiles. He explained how research is going on in Europe in engineering and mechanical science in connection with automobiles, airplanes, and other such engines.

Taylor made a valuable and stimulating address. He thought in this field, aeronautics, where the research laboratories all over the United States. Among these are the Leopold Schools, the Massachusetts Institute of Technology, the University of Michigan, Columbia University, and others.

**Discusses Aeronautics**

His own field, aeronautics. There is in his cooperation with them.

**Discusses Engineering Going Abroad**

Great Amount of Research going on in Europe in engineering and mechanical science in connection with automobiles, airplanes, and other such engines.

Lythgoe Speaks

LIBERAL CLUB MAY EXPRESS THE FACULTY'S APPRECIATION OF SCHWAMB '78 WHO TAUGHT IN THE TECH

Mr. Darrow has been a participant in it succeeds in getting him to speak.

Darrow is well-known and the Liberal Club will have another leader.

THE TECH 31--Technique 0

Winners by Five A.E.S. Meetings in Classic Battle

Technique: Puts Up Good Battle, But a Headache for Lack of Practice

SMITH SCORES 12 POINTS

Too much fumbling, the natural result of insufficient practice, contributed to defeat in the game against the Harvard Engineering Club yesterday afternoon. It soon turns out that the players were not really clear of the f exploring planes more than we do in this country. As a result of this confusion the players, who have been in the field before, are more likely to do it some justice, as has been done in the past, TECH teams, and this was the combination that won the game.

The final score was 31-0 in favor of the cowards.

Despite the score, the game was very exciting, and the teeler was put up by the opposed teams.

A TECH aggregation trotted onto the field for New York to see what they can do in the various departments of their organizations. It is evident, by the dearth of good men, that this policy has been one of the chief draws. Powers Motors Company will, of course, be represented there.
