**Soccer Teams**

Both freshman and varsity soccer teams are to meet at the beginning of the indoor season Monday. Starter training rules have gone into effect, and a competition for places on the relay teams is now under way. Relay teams were assigned in order that the many young men might accustom themselves to the sport.

The number of freshmen who take advantage of the Institute track facilities is very encouraging in those in charge of the sport. Great efforts have been made to have a competition lasting several days for them alone. It has heated up a great deal of time to prepare for this new capture, which will test their speed and scoring. This will serve as an interesting means of providing experience for the freshmen who have not had previous competition.

The objective of the Varsity as well as the freshman at present is to have the men ready for the indoor track, which will be held on Saturday, December 15. The indoor track will be run on rubber in Good year "Ingrfoots." These will have an unexcelled seamless butyl lining of new rubber. The newest type of track in the world will be used. The freshness tests have already been run, and the results indicate that the new type of track will continue to the end of the season.

**Handicap Meet To Be Held Dec. 15**

Interesting Contest Will Be Run for Benefit of New Men on Board Track

Schemes of great activity about the track are near the rear of the hangar. The beginning of the indoor season Monday.
