December 21st
9:00-Christmas Vacation Begins.

January 1st
9:00-Christmas Vacation Ends. Classes Resume.

EXPLANATION OF NEW LABORATORY

Will Provide All Facilities for Open-Ended Research With Enthusiasm

Many special and intricate types of research work will be tackled in the new Internal Combustion Engineering Laboratory that is being constructed in the year of 1928. All of this equipment will be provided immediately, but ample provision is being made for future apparatus. About forty new pieces of equipment will be added to N. A. C. E. Center of Alyssum, and some twenty-five other pieces of special equipment for air-cooling work, a refrigerating wind tunnel that will be used in experimenting with the cooling of engines, and a pumping station is being made. The present equipment is used in the laboratory will be transferred to the new building when it is completed. This will include some quantity of engine, a brake tester, the chassis for building 2, and a number of equipment.

APPLICATION FOR INTERNSHIP FOR FRESHMEN

Orders are being taken for the new issue of the Student Directory and our membership is increasing throughout the country. To the freshmen who have not yet ordered their internships, and those who are not in the directory, it is called to your attention that this is the time especially to arrange for an internship which will seriously interfere with your personal liberty and will also cost you nothing. This is the time to be sure to have your internship arranged for and to be sure to have your name in the directory.

FRESHMEN HARRIERS HAVE POOR SEASON

(Continued from Page 3)

in the Houston Coliseum. The Freshmen Harriers had a very poor season this year. Their meet in the Houston Coliseum was disappointing, and they failed to show any improvement over their previous record.

Future Meetings

The Freshmen Harriers will meet again in the Houston Coliseum next year, and it is hoped that they will improve upon their present record.
