CIRCUS WILL NOT BE HELD THIS YEAR

PROPOSAL TO REPLACE CIRCUS WITH CARNIVAL DEFEATED AT MEETING

Betas' Toonerville Trolley Which Was Prize-Winning Float at Last Circus

NEW PLAN CAUSES MUCH DISCUSSION TO RENEW CIRCUS

Hamlin, Boyer Head Opposing Plans for Holding Carnival

RECOUNT IS NECESSARY

No Circus will be held at the instigation of the Student Council, which decided upon at the Institute Committee meeting, held in the North Hall of Walker Memorial, yesterday afternoon. The proposal, to which considerable opposition was expected so recently it would be advisable to hold a Circus this year was presented by the Student Council and the Institute Committee had made its report the previous week. At this meeting the Institute Committee that an Alternate Carnival be held next year in the place of the Circus. This would take the place of the Circus, which was abandoned last year. This brought about a great deal of discussion, with the principal objection being that the Circus was the institution under a different name.

Real Carnival Proposal Under the tradition in favor of holding such a Carnival it was presented last fall. It is run in the summer months and is held in the cottages, residence halls, etc. The present plans are to give everyone an opportunity to participate and it is hoped that the Carnival will be as great as previous ones.

At the former Carnivals, acts were put on by the various students who were interested. This year all the classes are to be put on by the various students who are interested.

WILL LECTURE HERE

FOREIGN PROFESSORS TO LECTURE HERE

Three visiting professors from foreign countries will lecture at the Institute this Spring. Professor Luitgard Steyskal, chief Electrical Engineer of the Siemens-Schuckert Works in Berlin, and Honorary Professor, Director of the University of Leipzig, was scheduled to lecture from April 6 to 20. Professor Luitgard Steyskal, chief Electrical Engineer of the Siemens-Schuckert Works in Berlin, and Honorary Professor, Director of the University of Leipzig, was scheduled to lecture from April 6 to 20.
