T. C. A. SPONSORS INTERVIEWS FOR SOCIAL WORKERS

Men Interested in Boys' Work Offered Opportunities

Under New Plan

175 LETTERS SENT OUT

Opportunity is offered all men who wish to enter some form of boys' work, such as the teaching of games and sports, and similar organizations, under a plan announced yesterday by the Television and Radio Station of the New York University. Letters were sent out to 175 freshmen who had indicated on their activity cards that they were interested in this kind of work.

The present plan is the direct result of an interview held December 1st with the members of the television and radio station. They stated that they desire to render service of this kind but were unable to do so at that time. The T. C. A. did not possess the necessary facilities to place them in positions. However, coming into cooperation with the T. C. A., they will establish a branch of the organization in each of the colleges, and the work will be handled in the best way possible.

In addition, the Secretary of Secretary of the Institute of Technology, who has been given the responsibility of this work, said that he would like to have each college establish a branch of the organization in the school, and that the work would be handled in the best way possible.

In the beginning, we have a clear demonstration of the effectiveness of Einstein's new attempt over the previous ones.

CHEMICAL SOCIETY TO HEAR H. O. HECHE

Professor H. O. Huche is to speak on the Northern Section of the American Chemical Society on his lecture tour of the eastern states. He is expected to speak at the meeting of the American Chemical Society, which is to be held in New York, on December 1st.

FRESHMEN FOUR FIRE FOUR MATCHES THIS MONTH

Firefighting is one of the training problems for the freshmen. The fire department has announced that the freshmen will be required to carry four matches every day. This is part of the instruction given at the Freshman Fire Drill held recently.

THE SPORTS DESK

Frank and Ernest
