**Important Problem at Present is Industrial Application**

(From this is a selection of facts written within the work prepared in the laboratory to assist the research and experiment stations in the textile industry to learn the Textile Technology.)

The Research Laboratory of the Massachusetts Institute of Technology has begun the study of new problems, as our research workers have been engaged in research and development projects which have required the investigation of a great number of problems. In addition to these, they are now in the process of investigating the textile industry on the basis of the results obtained by the laboratory staff. The research is designed to improve the textile technology for the benefit of textile manufacturers and to better understand the textile industry in order to improve the conditions for textile production.

The work of the laboratory has been progressing in three phases. First there has been the necessity of designing and building the textile machines and equipment to be used in the laboratory. General routine testing for all the machines and equipment has been going on. The general routine testing for many of the machines and being done with the old equipment.

Tech Show Solicits Material for Open House Night Presentation

William C. Green Jr., Coach of Tech Show, discussed some possible ideas for next year's presentation at last Friday's meeting of the committee. The committee is now working on the idea of having a three-hour show, divided into two parts that each will last one hour, with a change of the theme in between. The theme of the first part will be "The Loudest Noise in the World," and the theme of the second part will be "A Night on the Beach." The committee hopes that the show will be well-received by the audience.
