Not so bad

Oberlin Rhodes dared to envision the six-letter grading system. Hereafter students at this college will either know whether it was a pass by a "C" or an "A".

New Orleans, La.—A physical di- ploma will be given to this grad- uate of Technology who has won varsity spirit letter, at Tulane university if

Dreams that come true

DREAMS THAT COME TRUE
An exciting change in the new grading system. Dreaming and smoking my old cob 70. I sit down and dream until I get a pull, and get a thrill.

I am in the writing game, you see.
And the grand-dramatic story being to arrive: Success of damage when the red blood run.
And the dreams all come from a bright blue can.
It's just a can of Edgeworth-cut—A passion as flammable as a mute. Of all Fane's kindly eyes to rain.
In the gift of dreams from the bright blue can.
I sit down at eve, to smoke.
And I am sitting alone in my room tonight.

A vision come true

In a part of Africa little known to the whites, where obars trolls run, Cecil Rhodes dared to envision a railroad. He lived to build it.

The railroad itself was part of a larger dream, a dream of a far inland colony linked fast to existing coast settlements by rail and all the communication. And he lived to build Rhodesia.

First the dream, then the reality, the rule with telephone men too, as they work to greater heights of service. But in be- cause, they know, must come periods of careful planning and smooth coordination of many elements.

Scientific research, manufacturing, plant construction, commercial development, many varied telephone activities offer a widening op- portunity to practical-minded visionaries.
