These Washable Window Shades Improve the Looks of a Building and Cut Replacement Costs.

Nothing can ruin the appearance of a building so quickly as dirty, dingy, window shades. Both from the inside and the outside, they are unsightly. Yet shades get dirty.—and replacement costs money. To combat these drawbacks, the O. Du Pont Company offers TONTINE, the window shade that can be washed, when soiled, with soap and water. Hence, TONTINE shades do not have to be quickly discarded because they have become soiled.

And because they are impregnated with pyroxylin (basically the same substance which makes Du Pont Duco so durable) they are unusually resistant to wear and tear. Window shades made by this special Du Pont process will not crack, pin-hole, fray or fade. They are long-wearing, always good looking, economical.
