The Long and the Short of It

Boit Prizes Given at End of Semester

Institute Committee Will Meet Tomorrow

Large Number of Men Out for Crew At First Meeting

Col. Edward Cline Transferred from Institute Service

Four Branches of M. I. T. Unit Will be in Charge of New Officers

L. Col. Robert C. Biddy has recently been appointed to head the department of Military Science and Tactics, taking the place left vacant by the removal of Col. Edward Cline, who was assigned to duty in the Hawaiian Islands. Major Robert Rechard, a new addition to the faculty, will take command of the Second Lt. Col. Biddy's Executive Branch.

Major Otteson, also a member of the faculty, will take the post of instructor in Planting Science. W. W. Scott, in active charge of the Burns Building, will take over this latter position. The position of Instructor in Applied Economics has also been filled by A. W. Anderson, former professor in the same department.

The winning crew of last year was featured in the first meeting of the freshmen crew team. The coach, W. L. Biddle, welcomed the new members with a talk on the organization of the team. He gave a brief history of the team and its outstanding achievements, and outlined the methods of training for the season.

The team will be divided into two groups, with the freshmen on one side and the sophomores on the other. The coach emphasized the importance of teamwork and urged the members to develop a strong spirit of co-operation.

Prize Songs Go on Sale at Information Room

Protests of Sales Will Be Used to Purchase New Shell for Boathouse

The sale of the prize songs is a yearly event and is eagerly anticipated by the students. This year, the songs are on sale at the Information Room and are expected to raise a significant amount of money for the purchase of a new shell for the boathouse.

The songs are composed by the students and are sold for small amounts. The proceeds will be used to purchase a new shell, which is essential for the continued operation of the boathouse.

The sale is being advertised on the bulletin board and is expected to attract a large number of customers.

The music for the sale is donated by the students and is expected to be of high quality.

The sale is being conducted by the student council and is expected to be a great success.

Miners Get First Taste Of Underground Surveying at Camp

Fourteen Studied Rodulums of Mining Engineering at Denver, Colorado

Among the interesting courses of study at Denver is the one taken by fourteen students of M.I.T. who made a four-week tour of the Colorado mines during the summer. Their study centered around the problem of surveying in the mines.

In the heart of the magnesium-mining region, the students were introduced to the techniques of underground surveying. They were taught how to use the prismatic compass and how to lay out the survey.

The project was supervised by instructor in mining engineering, and the students were given a thorough grounding in the techniques of surveying.

The experience was highly beneficial to the students, and they were able to gain a practical understanding of the problems involved in underground surveying.

The trip was a great success, and the students were highly satisfied with the experience. They were able to apply the theories they had learned in the classroom to practical problems.

President Urges New Men to Join With an Activity

Stress a Value of Dividing Time Between Studies and Extracurricular Work

MEETING WELL ATTENDED

Compliments Class on Ready Adoption of the Cardinal and Gray Ties

"An engineer must be a gentleman," Col. Edward Cline is often heard to say. "An engineer must be a scholar, a gentleman, a scholar."

The value of participation in an activity is not just entertainment, but also an expression of the college's commitment to the development of the individual.

The meeting was a success, and the students enthusiastically adopted the Cardinal and Gray ties as the school's colors.

The meeting rounded out the busy day, with discussions of new rules and regulations and a demonstration of the new colors."}
