ANNUAL ALL-TECHNOLOGY SMOKER TO TAKE PLACE IN WALKER MEMORIAL FRIDAY

First Sophomore Mass Meeting Is Scheduled Today

Plans for Field Day Will Be Discussed by Leaders of Sports

Tech Show Plans Smoker For New Men at Institute

Meeting on October 16 in Final Date to Hand in Skits For Production

Tech Show for 1930 will be launched at the alumni meeting, which will be held in Walker Memorial, October 16. At this class the routine for skiis for the show will be drawn, and all non-working on skiis are urged to sign up as soon as possible. At the smoker a junior and senior team will be announced, as well as an outline of skiis and acts that have been resolved upon.

At this time only a limited number of women have been assigned and it is hoped that more students will join the class. Five different songs will be included in this year’s show. Skiis may be tried out at the Student Center during the afternoon of Thursday, October 16. Nicholas Townsend, Chairman of Skiis, has been successful in recruiting a number of skiis this year. For the first time, however, the illegal arrangement by the skiis to be used in the show will be announced. It is hoped that a large number of students will sign up for these skiis.

Large Number of Improvements in Central Library

Rubber Tipped Chairs and Padded Floor Installed to Lessen Noise

During the past summer more than $60,000 was spent for alterations and improvements in the Central Library. After a thorough investigation of the present library facilities by Paul H. Chadbourne, who has been in charge of the library since the institution of thetrustees, it was decided that changes should be made. Among the improvements which were made were:

1. The addition of new and improved library furnishings. These include new bookshelves, new tables, and new chairs. The new chairs are made of rubber and are padded with a soft material to lessen the noise when used. The new tables are made of solid wood and are designed to hold books and other library materials.

2. The installation of new lighting fixtures. These fixtures are designed to provide better lighting for the reading and studying rooms of the library.

3. The installation of new heating and ventilating systems. These systems are designed to provide better temperature control and ventilation for the library.

4. The installation of new furnaces. These furnaces are designed to provide better heating for the library.

5. The installation of new water systems. These systems are designed to provide better water for the library.

The improvements in the Central Library are the result of the hard work of the library staff and the students of the library. The students of the library worked hard to make the library a better place to study and learn.

EDISON JUBILEE TO BE OBSERVED HERE

Tech Professor to Address New Candidates at Morning Session

Edison Jubilee to be Observed Here

At the request of the administration, the Edison Jubilee will be observed here this year. The Edison Jubilee is a memorial to Thomas Edison, the great inventor, who was born on February 11, 1847. The Jubilee is celebrated by the presentation of a talk on the life and work of Edison, followed by a discussion of his inventions and their significance.

The Edison Jubilee is an opportunity to learn about the life and work of one of the greatest inventors of all time. It is an opportunity to learn about the progress of science and technology, and the impact of these developments on our lives.

Tommy O’Donnell, the Tech professor, will be the speaker at the Edison Jubilee. He will give a talk on the life and work of Edison, followed by a discussion of his inventions and their significance.

The Edison Jubilee is an opportunity to learn about the life and work of one of the greatest inventors of all time. It is an opportunity to learn about the progress of science and technology, and the impact of these developments on our lives. It is an opportunity to be inspired by the spirit of innovation and discovery that pervades the world of science and technology.

Every member of the 1932 class should make it a point to attend the Edison Jubilee. It is an opportunity to learn about the life and work of one of the greatest inventors of all time. It is an opportunity to learn about the progress of science and technology, and the impact of these developments on our lives. It is an opportunity to be inspired by the spirit of innovation and discovery that pervades the world of science and technology.

PROGRAM STARTS WITH FREE MEAL FOR ALL NEW MEN

Sports Exhibition and Vaudeville Acts Included in Eve-

FREE SMOKES FOR ALL

Technique Cup to be Awarded to Track Team on Saturday

In addition to the traditional free meal for all new men, this year’s Tech smoker will include sports exhibition and vaudeville acts. The sports exhibition will feature exhibitions of track, baseball, and basketball, while the vaudeville acts will include comedians, magicians, and other entertainers.

The centerpiece of this year’s Tech smoker will be the Technique Cup, which will be awarded to the track team. The Technique Cup is a special award that is given to the track team that performs the best at the annual smoker. The track team is expected to perform at its best this year, and it is a good bet that the Technique Cup will be awarded to the track team.

The Tech smoker is a tradition that has been going on for many years, and it is a great opportunity for new men to get to know their fellow students and to have a good time. It is a tradition that is sure to be enjoyed by all new men.

PLANNING FOR FIELD DAY IS UNDERWAY

Students Chosen to Suit the 1929 Rules
