University World Cruise Arrives
At Glasgow for Purpose of Study

One hundred students and professors, comprising the Third World University Cruise, arrived in Glasgow yesterday. Their recent voyage a pattern of seven months, during which they will explore the globe. They spent the winter in Europe, where they will also explore Europe. The cruise, which started in Great Britain and the con-

4:00—Tech Catholic Club dinner meeting, North Hall, Walker Memorial.
4:00—Research meeting, Pratt Living Room.

Intercollegiates

One writer in the Beverly "Stuart" charts the progress of the Yale University and the University of London. In the past, our writing has been more interested in the private life of the students and the faculty members. This year, we are trying to present a more complete picture of the university as a whole. The following is a summary of the information we have gathered:

The building contains many rooms and facilities, including a large dining room used for private meetings, a reading room, the library, a phonograph, and several lounges and game rooms where students can relax and socialize. The building was first opened in 1917 and has been the meeting place of many societies and organizations since then.

The building is located at 23-25 Massachusetts Ave. in the North Hall and was constructed with funds provided by Senator Arthur Capper of Kansas. It is an easy, pleasant walk from the second floor to the first floor.

Fifteen hundred technical publications in all languages, dealing with many fields of study, have been surveyed and selected in the interests of acquiring the best material for the technical library. The results of modern study have been made available in this library.

A bill has been introduced into the Senate by Senator Arthur Capper of Kansas, which provides for the establishment of a separate department of study in the United States Senate in the president's cabinet.

The following is a list of the members of the various committees appointed for the All-Technology Smoker which will be held on October 23:

E. M. Hawkins, chairman
R. E. F. Brown, chairman
John H. Gingerly, chairman
Edwin R. Bouse, chairman
