OF GENERAL INTEREST

Hydraulic Turbines—Dr. Ing. D. Thoma, Monday, October 14, 2 P. M., Room 1090.

Dr. Ing. D. Thoma, Professor of Hydraulics, Water Power Machinery, and Water Power Plants, and Director of the Hydraulic Institute at the Technische Hochschule of Munich, Germany, is presenting a series of lectures on hydraulic turbines and related subjects in Water Power Plant Design. The title of his second lecture will be "The Hydraulic Storage of Energy." The lecture will be illustrated by moving and still pictures. The lecture is open to students and members of the instructing staff.

Undergraduate

CREW

Any freshman desiring to substitute crew for P. T. can do so by signing up any day in MacCarthy's office in the Walker Gymnasium between 9 and 12 o'clock. Medical certificates will be required.

Intercollegiates

The popular idea that college routed have always spent much of their leisure time away from campus is being dispelled by the report of the freshman enrollment in Boston, according to the Alumni Bureau of Organization. The report states that last year the students spent a total of 75 per cent of their leisure time in taking regular college courses.

Five thousand students, or 75 per cent of the entire student body are said to be either totally or partially self-supporting.

New Tobacco

The rate of enrollment in American colleges has fallen off sharply in the last year, indicating an end to the universal best-payer college enrollment, according to a report in the Columbia "Spectator." The principal reason assigned for the change is the great increase in the number of junior colleges, although recent immigration restrictions, limiting admission of students from other countries, has also played a considerable role.

Old Gold Cigarettes

Turn the light on the Truth!

It's just naturally good tobacco—no "artificial treatment" that makes OLD GOLD gentle to the throat and better to the taste.

No one cigarette-maker has any monopoly on the heat-treatment of cigarette tobaccos.

For best-treatment is neither new nor exclusive. It has been used for years by practically all cigarette-makers to "set" and sterilize their tobacco.

But OLD GOLD's goodness does not depend on artificial treatment. It is the product of naturally good tobaccos...carefully selected for mildness, smoothness and flavor. Tobacco made free of "throat scratch" by Mother Nature herself.

Try a package. You'll immediately get the thrill of this smoother and better cigarette. And you'll know then why OLD GOLD's sales are ALREADY THREE TIMES GREATER than the combined growth of three leading cigarette brands during a like period of their existence.

Better Tobaccos make them smoother and better...with "not a cough in a carload".

On your Radio: OLD GOLD—PAUL WHITMAN SHOW. Paul Whitman, with his complete orchestra, every Tuesday, 9 to 10 P.M., Eastern Standard Time.
