Radio Being Installed in Walker; Elaborate Apparatus Will Be Used

Involves Expenditure of $500—Music Will Be Provided For Functions

Plans for equipping Walker Memorial with radio are almost materializing under the direction of Earl Cullen, 21, president of the Radio Society, financially supported by the management of the institution. Although many details of the installation are not yet finalized, the work is progressing at a point where it is certain that radio reception facilities will be installed in the near future.

An electric phonograph turntable and a Federal-Cabinet magnetic pickup for the playing of records will also be included in the setup. The entire apparatus will be a marvel, according to a Federal engineer.

Improve Acoustics of Hall

Among the projects which are being met in the actual installation is the matter of the acoustics of the hall. The tournament manager has made it clear that no other candidate will be considered for the position of the Walker Memorial Hall.

Three Amplifiers to Be Used

The reproduction will be handled by three power amplifiers with a total output capacity of 25 watts, which will be much more than adequate to supply the necessary amplification to the entire building. The amplifiers are of the "PAN" type, said to be superior to any other, and will be equipped with adjustable equalization, to the specific requirements of the hall.

SQUASH TEAM PLANS SUCCESSFUL SEASON

"Coming along in fine style," is the present status of the squash team Technology for this year, according to Manager Fitch. On Monday of this week the final matches of the indoor season were held, and from these results it will be possible to choose the final members of the team. The tournament was conducted in such a manner that no team member played against another in any one contest, and the last four matches of each member's ability will be taken into consideration.
