The dots on this map show the hundreds of places where we have done engineering or construction work. They are an indication of our wide knowledge of labor and material markets and our long experience in building under the varying conditions obtaining in different sections of the United States and other parts of the world.

World-wide construction experience

... represented by a billion dollars worth of work

The example of President Hoover in pushing the immediate construction of great public works is being followed by manufacturers, railroads, public utilities and institutions everywhere.

New facilities—shops, factory extensions, railway terminals, power developments, electrification, foreign branch plants—are being immediately projected.

In connection with this national building program the services of this company are available to American industry.

Our experience is indicated by a billion dollars worth of work performed for 1200 clients located in practically every state in the Union, seven Canadian provinces and 12 foreign countries.

Through our offices strategically placed in five principal cities in this country and through our three foreign companies we are prepared to handle construction undertakings anywhere in the world.

United Engineers & Constructors Incorporated
