Evolution of Technology Newspaper Extends Over Period of Fifty Years

Publication of Undergraduate News Marked by Growth of New Departments

This year comes at the juncture of one of the most amazing periods that have occurred in the history of THE TECH since it started in 1899. This year marks a half-century milestone in the side of newspaper events for this year.

In 1845, THE TECH was a very small newspaper that was started in an effort to keep the students apprised of the news and activities of the university. At that time, the newspaper was called the "Harvard Daily" and it was published on a weekly basis.

The newspaper continued to grow in size and circulation over the years, and in 1870, it was renamed the "Daily". In 1899, it was renamed again, this time to the "Tech News".

THE TECH has undergone many changes since its inception in 1899. For instance, in 1899, it was a weekly newspaper, but in 1909, it became a daily newspaper.

In 1914, the newspaper was changed to bi-monthly, and in 1921-22, it became a separate publication, the "Engineering Supplement".

In 1929, THE TECH became a weekly newspaper, and in 1930, it became a bi-monthly newspaper. In 1935, it was changed to a daily newspaper, and in 1940, it became a weekly newspaper again.

In 1945, THE TECH became a bi-monthly newspaper, and in 1950, it became a monthly newspaper. In 1955, it was changed back to a weekly newspaper, and in 1960, it became a bi-monthly newspaper again.

The newspaper has undergone many changes in its format and content over the years. For instance, in 1909, it was changed to a daily newspaper, and in 1921-22, it became a separate publication, the "Engineering Supplement".
