CLOSING A BREACH

DR. ROWLAND and the Advisory Council on Athletics are to be credited with having rescued the athletic relations between Harvard and Princeton perhaps one step nearer to reality.

The occasion was the reason why two great rival universities should hold to stiff-necked, unyielding, and uncompromising policies over the question of athletic relations, accordingly, a comparatively trivial issue, a quarrel that would be better forgotten and forgotten, and thus keep adding to the seriousness of the unemployment problem. In the last year or two there have come occasional examples, illustrating how the mass of black and white liberally be- tween the lines:

Speaks of Technology Spirit After Twelve Weeks Here

(Continued from Page One)

"Harvard's library is the largest and the most complete of the things I've seen. I came here with a high opinion of the school and I was not disappointed. I'm getting just what I wanted, but I'm certainly getting it in a little different way than I have been before."

"Mr. Walker, who was once president of the Association, was not on the head when he said that you work all the time and not for boy's play. This week during the fall I bought only two books out of six that I wanted to get."

"Grounds Very Impressive.

"One, after a few more questions, had been asked, he stated that the course was entirely different from what he expected, and that it was hard to be sure when to change from one to the other."

"Has been here, and been in the school for the past three months, and is looking forward to the year."

Prefer Southern Girls

While the students may not have any exclusive contact with the girls of Harvard, the students of the technology are definitely liberal and are not opposed to the idea of the girls being present in the hall. (Continued in next issue)
