

Rifle Team Wins Another Meet In String Of Coups

Continuous Chain of Victories Marks Trail of Beaver Rifle Squads

Averaging 77.25 per man, the Institute R. O. T. C. Rifle Team won another match, last Friday night at the home range, defeating the Boston Post of the Army Ordnance Association, which averaged only 70.80 per man.

Table with 2 columns: Name and Score. Lists team members like Maj. Marshall, Col. Nash, etc., and their scores.

STUDENTS STUDYING PROPERTIES OF CLAY

(Continued from Page One) icts and also includes laboratory periods during which typical tests are carried out. The object of these courses in ceramics is to stress the basic principles and value of fundamental research, rather than to offer trade school courses.

In the present senior class at Harvard University there is one prospective bear tamer and one student who considers the writing of epic poetry his vocation.

Signups For Track Due Before Jan. 24th

January twenty-fourth is the sign-up dead line for PT-2 substitution. All freshmen who are now substituting some sport for physical training and wish to do so next term, as well as those who are continuing their athletic activities from last term must sign up in Mr. McCarthy's office before Saturday.

WITH THE AMERICAN COLLEGE EDITORS

FACULTY COLUMN

In addition to some technical preparation for a career, college offers to every student one master opportunity, the chance to live an experimental life. What is done in college has indirectly an incalculable influence on life after graduation, but it has no direct and immediate bearing on one's livelihood and one's place in the world.

The major responsibilities of life rest lightly on the shoulders of the college student because he does not yet confront them face to face. This is the reason for that care-free attitude of mind which is the typical characteristic of college days and one of their greatest charms.

Hence academic life is a laboratory where at slight cost and risk, can be established certain fundamental principles on which largely depend one's later success and enjoyment of life.

A graduate who has, even unconsciously, accepted the best principles that are worked out in the academic "laboratory of life" has not been to college in vain. If, in addition, he has acquired the willingness and the ability to work out these principles for himself; if he has learned to be at home in the presence of ideas, so that he enjoys their society, and is on familiar terms with them, he has made his own the best that college can offer.

—U. of Vermont.

Engineering, to the Engineer, should be the best profession in the world. Without this attitude, to him, it will never be more than a poor means of making a livelihood.

The man who can not or will not boost for his chosen life work has no place in this field. If as a victim of poor judgment or of some one's else influence he has been forced into the work and is dissatisfied, he should have the internal fortitude to acknowledge his misplacement and avoid further embarrassment to self and his profession by removing himself from its toils.

Men who are recognized as leaders in their respective professions, are men who are wedded to their jobs; men who will sacrifice the comforts of home, the lure of the golf course, or the possibilities of immediate wealth, in order to raise the standards of their chosen profession to higher level.

Men choose engineering training that they may be engineers. The more training they receive the more enthusiastic they should become. The more enthusiastic they become the better boosters they should be for engineering. If this logical progression is impossible, then, there is but one logical way left, that is—OUT.—Colorado School of Mines.

BASKETEERS LOSE GAME TO CRIMSON

Engineers Meet St. Micheal's In Next Game After Mid Year

(Continued from Page One) ter was high point man for both teams, scoring nine points. Five men were next in line for scoring honors, these being the four forwards and Moushegian, the Crimson center, all of whom made six points.

In the preliminary freshman game, the fans witnessed another hard fought game. This was also Harvard's game all the way through according to the score, although they never maintained more than a four point advantage except right at the conclusion of the contest.

MID-YEAR EXAMS ARE ABOLISHED BY YALE

(Continued from Page One) or better in at least six courses.

Early in February each year at the call of the dean's office, each instructor shall make a report on the quality of work being done by each student in his course. All students whose work at the time is unsatisfactory in three courses will be placed on general warning; the same for students on two subjects after a review of the student's status in all subjects.

Any student who during freshman and sophomore years has not received a grade of 27 or higher in at least two courses shall be dropped from the college.

The Greyhound, of Loyola College, tells of the freshman who, on inquiring of an upper classman the meaning of the motto "Lobo y Olla," on the school seal, was told that it was Spanish for "All above 65 is wasted effort."

Senior Board of Volume L To Publish Last Issue

The final edition of Volume L will be published Friday under the supervision of the outgoing seniors. Gilbert M. Roddy, General Manager, Edward B. Hubbard, Editor, Ralph H. Davis, Managing Editor, and Harmon J. Truax, Business Manager. The first issue of Volume LI will be on Wednesday February 11.

Sports Desk

Basketball is a fast enough game in itself, without having explosions, people rushing madly about trying to take photographs and corner coaches adding to the general confusion, which naturally accompanies a gathering of the sort.

To see Jesse Schumacher, freshman 220-pound wrestler, engage with Wing Lem, the frosh 118-pounder, is one of the joys of an afternoon spent loitering in the Hangar gym. It's all one way until the two boys meet the mat, and if Schumacher happens to be flat, there is a surprising scrap.

Watching the old-timers in the P.T. substitution game, those who have had the same thing in prep school, and the few who have caught on to the tricks since they've been here reveals some neat tricks to avoid any heavy exercise. One says to come out on rainy days, and do a couple of snot puts in the gym.

The Tufts Weekly tells of a little run-in between a group of students at Swarthmore and their Dean. It seems that the Dean had ordered all men to appear for dinner wearing coats and ties. One hundred of the students, in protest, ignored the ruling, and were promptly ejected from the dining hall.

High Jump Will Be Next Event In P. T. Competition

Many Prospective First Year High Jumpers Are Out For Practice

Interest is increasing around the track house these days as the P. T. Competition moves along, and a great deal of rivalry is being shown among the freshmen in the various events. An event which will get underway soon is the high jump. With more high jumpers practicing this season than last, Coach Hedlund expects last year's records to be raised.

Last year 59 men competed in the high jump, and the average height was slightly under 4 ft. 8 in. This was rather low, for the men had to jump from the hard gym floor with rubber-soled shoes. However, with the new dirt jumping pit, installed recently in the Hangar, conditions are much better, and a higher grade of jumping should result.

Table with 2 columns: Name and Height. Lists jumpers like E. Butkus, E. Pierce, etc., and their jump heights.

DERIVE FORMULA FOR CARDINAL AND GRAY

(Continued from Page One)

tioned whether any sample of cardinal and gray actually used by Technology students in 1876 can have survived to this day without suffering some slight change in color, the Alumni Association has in its archives certain small pieces of remarkably fresh looking silk ribbon which claim to date back to that period.

The research which has resulted in the standardization of the official colors of the Institute was carried out under the direction of an alumni committee composed of Dr. Samuel P. Mulliken '87, Professor of Organic Chemistry, Chairman; Dr. Allan W. Rowe '01, Charles Bittinger '01, and Professor Arthur C. Hardy '18 of the Department of Physics.
