BOILERS AT M. I. T. NEED SIXTY TONS OF COAL PER DAY

Staff of Fifteen Required To Operate Plant Furnishing Heat and Light

COSTS $302,000 PER YEAR

(Continued from Page One)

On Wednesday, February 25, in Rogers
B. Rhines, Robert B. Semple, and WiI-
Karl T. Compton, President of the In-
pounds, while the three million K. W. H.
is stupendous being 200,000,000
amount of steam generated in a year.
tem cost just half and the remainder
aries at $30,000. Of the total invest-
culations for the total overall cost
is the average cost for the produc-
ning and experimental purposes. Fou
of live steam is the generating of
xiers, and is used to heat
snowy day. The larger and lower
and
goes to their separate destinations.
inch mains respectively, which run di-
essary to pay for their cartage.
