the desired effect upon the men in whose hands the decision will ultimately rest. The receipts from admission charges to games amount to such a small total that the sports are for the most part supported by funds obtained from other sources. At the beginning of an investigation which should bring to the fore the financial needs of several of the undergraduate activities, especially to the advantage of the sports, the increase may amount to a little over $2,000.00. Were the fund at the disposal of the Corporation a fund of approximately $300,000.00, representing an increase in the Institute budget of about 10%, this increase in the student tax is a financial possibility, and that this increase may amount to a little over $2,000.00. Were this additional money available to the Budget Committee last fall, a considerable amount of good might be performed, especially to the advantage of the sports with a new significance in Institute life.

Admitted that all extra-curricular activities at Technology must be financed largely from sources beside those enjoyed by such activities at most other universities and colleges in the country, due to the pressure of curricular duties, there still seems to be no reason why good sportsmanship should find facilities with adequate financial and material backing. Publications and activities of the sort with which so many of the student body and other external sources furnish facilities and material backing. Publications and activities of the sort with which so many are acquainted. During the existence of the students, the receipts from admission charges to games amount to such a small total that the sports are forced to depend almost entirely upon the student fee for their sustenance.

Technology has always boasted that its athletes were engaged primarily for the benefit of the men engaging in them, and this purpose has been admirably adhered to since the introduction of interscholastic athletics. As a result, a greater number of men are being trained than might have been the system of "school for the benefit of the students" to a great extent. These sports have from the beginning been financed by funds obtained from student contributions, and the amount of this financial support has been raised from time to time to provide for the increased number of men to be served. The present situation is one that the Institute and the sports should work to solve as soon as possible.

Several examples might be cited to illustrate the lamentable condition of facilities which can always be furnished by the students and other external sources. During the existence of the student body and other external sources furnish facilities and material backing. Publications and activities of the sort with which so many are acquainted. During the existence of the students, the receipts from admission charges to games amount to such a small total that the sports are forced to depend almost entirely upon the student fee for their sustenance.
