Discordant Noises of Former System Necessitates
Replacements

Whether you are walking through the halls of the
Building, or sitting in the lecture room, it is be-
coming apparent that the noises which come from
the air conditioners and other electrical devices
throughout the buildings are becoming more
frequent. At this time, although annoying, is not
nearly as disturbing as what is to come. The mo-
mentary stops of the air-conditioning units are
such that they may be simply heard as the inter-
mitter of the building. Yet for the future users of
the building, although genial, is not a noise that
will become especially popular.

"I hope to God they will put a stop to the
beeping noise. It is irritating to the ears to hear
that noise all the time. It is almost unbearable to
have to hear the noise at the moment when you
are trying to get to sleep. I have to get up at
the moment the noise is stopped. I seem to be in
the building all the time in order to avoid the
beeping noise. I hope they will put a stop to it as
soon as possible."

Intermittent stops are not the only noises that
are to come. The recent noise of the air con-
ditioning units is to be replaced with a more
annoying one. The new noise will be a continu-
ous one, coming from the ventilation units that
are to be installed.

The Atmospheric Association is cur-
rently investigating the causes and potentials of
this new noise. A schedule is arranged, and
money is being raised for the investigation in the
amount of fifty dollars per year. The Association
is also working on the possibility of getting a
complementary amount of money from the Ac-
cession for cutting down the noise level.

The Athletic Association is con-
vinced that the new system of air conditioning
will be beneficial for the students and faculty. The
Association has already begun to make plans for
the installation of the new system in the Building
for the next year.

As the new system begins to take
shape, there will be a decrease in the amount of
time that the students and faculty will have to
spend in the building. This will be a great bene-
fit for the students and faculty. The new system
will also reduce the amount of time that the stu-
dents and faculty will have to spend in the build-
ing during the day. This will be a great help for
the students and faculty.

In conclusion, the new system of
air conditioning will be a great benefit for the
students and faculty. The new system will reduce
the amount of time that the students and faculty
will have to spend in the building. This will be a
great help for the students and faculty.

ARCHITECTS PLANS FOR NEW WALKER

Overruling Necessitates An Immediate Measure of
Alteration

Current discussion of the means for
improving Walker Hall has been
made by Mr. Robert L. Walker, President of the In-
stitution, at a meeting of the Class Councils rep-
resentatives after the death of President Walker.

It was voted at that time to appeal a
committee to raise funds for a sym-
phonic instrument for Walker Hall. The
members of the committee were appointed by
the Student Senate and the committee was
appointed at that time.

The present building is almost the
same as the old Walker Hall. The only change
that has been made is the addition of a new
floor. The new floor has been added to the build-
ing and the old Walker Hall is now used as a
library. The old Walker Hall is also used as a
place for concerts and other events.

It is the intention of the Student Sen-
ate to raise funds for the construction of a new
building. The new building will be used as a
library and a place for concerts and other events.

In conclusion, it is the intention of
the Student Senate to raise funds for the con-
struction of a new building. The new building
will be used as a library and a place for concerts
and other events.

PRESENT PRIZES AT THE TECH BANQUET

Awards for meritorious service were
made in seven numbers of THE TECH
and one hundred dollars in prize money was
situated in the Fainting Room and Hall in the
Library Building. The awards were given for
their fine work and for being a spirit of friend-
ship between the members.

Eight of the short speeches were
made by a high school and the other seven were
made by the committee for choosing the best
speech. The best speech was given by the com-
mittee for choosing the best speech.

The best speech was given by the
committee for choosing the best speech. The
committee for choosing the best speech was
made up of the best people in the country.
