Building Construction

Mr. Thomas F. McSweeney '16

Monday, April 6, 10:00 A.M., Room 1-134

A source of illustrated lectures on "The History of the Art of Building" will be a feature of the Department of Building Construction during the second term by Mr. Thomas F. McSweeney '16. It is open to students and members of the department.

Welding

Mr. Peter P. Alexander

Monday, April 6, 4:00 P.M., Room 4-156

A series of lectures on "The Mystery of Welding and Its Industrial Applications" is being given during the second term, under the auspices of the Department of Building and Welding, by Mr. Alexander. Research Engineer, Thomson Research Laboratory, General Electric Company.

Open to students and members of the instructing staff.

Dept. of Electrical Engineering and Metallurgy

Dr. R. S. Dean

Wednesday, April 8, 4:00 P.M., Room 4-156

Dr. R. S. Dean, metallurgist, will deliver a lecture under the auspices of the Department of Mining and Metallurgy on "Recent Developments in the Metallurgy of Steel". It has taken several years to bring the key either with a regular gun, or with a 12 gauge and a radio station, the results may be judged by the following:

Barber's Camp:
- No contact for 24 hours; convenient for the radio station.
- No contact at all for 24 hours.
- No contact with 12 gauge.
- No contact with a regular gun.
- No contact with a 12 gauge and a radio station.

Wednesday, April 8

4:00 P.M.—Trucks meet Armitage, Room 10-275.

4:00 P.M.—Meeting of Automotive Engineers dinner meeting, Faculty Dining Room, Walker Memorial.

5:00 P.M.—Instrumental Club rehearsal, East Lounge, Walker Memorial.

12:00 Noon—Army Ordnance Association luncheon, North Hall, Walker Memorial.

5:00 P.M.—Civil Engineering Society dinner, North Hall, Walker Memorial.

6:30 P.M.—Civil Engineering Society banquet, Grill room, Walker Memorial.

6:00 P.M.—Society of Automobile Engineers dinner meeting, Faculty Dining Room, Walker Memorial.

12:00 Noon—Army Ordnance Association luncheon, North Hall, Walker Memorial.

WHERE ?

Can the reader who is fond of Sport find better pages of Sporting News than those which are printed every evening in the Boston Transcript? Where can he find a better written Sporting News, better illustrations of Sporting News than in the Sporting News Pages printed every evening in the Boston Transcript?

The answer by those who follow Sports, who know something of what is to be found in other papers, is—

Dynamite clears the way for modern engineering wonders Can 129 Years’ Experience help YOU?

IN 1802, E. I. du Pont de Nemours, a young French chemist in America, built and began to operate a small powder mill on the banks of the Brandywine River.

Today—after 129 years—the trade-mark of the du Pont Company is well known throughout the industrial world. Du Pont Explosives have played a major part in building the nation's railroads, highways, aqueducts, reservoirs and subways; in clearing millions of acres of land, in mining enormous quantities of coal and other minerals, and in making possible many great engineering enterprises.

Du Pont has never been content merely to manufacture explosives. Its highly trained technicians have spent years in chemical research . . . matching ingredient against ingredient . . . to develop new improvements to make new explosives that will do a given job better. It is significant that a vast majority of all valuable New explosives come from the du Pont plants.

The information that du Pont has gathered in more than a century and a quarter is available today—tomorrow you can't afford not to know about Dynamite.

WHERE?
