MUSICAL CLUBS TO PERFORM ON FRIDAY

THREE CONTESTANTS TAKEN OFF BALLOTS

ELECT REVIEW HEAD TO PI DELTA EPSILON

BELL SYSTEM

Catacombs of communication

Beneath the streets of most cities Bell System men build catacombs of communication. Through these subways run the cables that may serve millions of telephone users.

From each central office, cable systems throughout the area are served. Other districts, containing town lines, connect one central directly to another. Still others contain long distance circuits which join the telephones in one city with those in another.

This great underground system exists today only because years ago telephone engineers worked out. As the telephone habit grew they foresaw the need of clear communication, and the need of overhead wires and protecting circuits for greater efficiency and ease of maintenance. And today this practice of forward planning goes right on.
