BATTLE OF CENTURY TO BE Fought for Technique Paddles
Over One Hundred Fraternity And Dorm Names Sworn For Honors

BLOODY SCRAP IN STORE

I readily testify to this. Many students territories. Many have an overwhelming control their emotions and stay before the battle's. From a broken arm to the more serious type of misfortune that might befall the battler's. The fight promises to be warm and free-for-all.

Two Outstanding Developments in Building Construction on Exhibition

Demostrate Welding of Steel And New Portland Cement Brick

Two of the outstanding new developments in the field of building construction are being straddled in the exhibit of the latest department to be added to the Institute Courses XVII, Building Construction. In the showroom is, in addition to light-weight door sections, the newest development welding of steel, which will be on display the first time.

Campus to "Use Walker"

When the "Walker" building, which was inaugurated last year, was dedicated, many new techniques became obvious. A committee was appointed by the Institute Committee and it prepared a report on the latest developments for the additions to be made. These plans appear to be in process of completion.

The present plan provides for a new entrance and for the addition of the third floor.

The seating capacity of the new building, which will be opened on March 19, the largest lecture hall at the Institute, can accommodate 1300 persons. However, to conduct commencement services in this space.

This auditorium will be placed in the new building. The present auditorium, which has a seating capacity of 600, is inadequate for the present day's activities. The Third Hall of the Institute will be made into a lecture hall. The new auditorium, which is 60 feet square, will accommodate many of the Institute's student organizations and committees.

Movies To Be Shown

During the entire afternoon and evening the evening a series of movies illustrating various phases of construction work will be shown at half-hour intervals. The purpose of the series is to inform the public of the various phases of the construction industry, which will be shown in the showroom.

Movie title plan is to cover the topics to be shown include: "The Function of a Building," "The Manufacture of Steel," "The Manufacture of Bricks," and "The Manufacture of Stone."

The plans will include a series of short films on the construction industry, which will be shown in the evening. The films will be shown on a projector and will be shown in the evening.

All Laboratories To Be Open to Visitors

Students of Chemistry Perform Experiments; Part of Regular Work

Following the custom of past years, all chemical laboratories will be open to the public on Open House Day. As a result of the interest that has been expressed, the faculty and graduate students have planned a program of activities for the day. They will be on display to students and faculty members who are interested.

Chain of Command

The chain of command will be chain of command that will be chain of command.

The chain of command will be chain of command that will be chain of command.
