The Lounger is getting old, and such folks as he, feel that the time has come for a change. He has heard it from various sources that the inside is rumored, but not confirmed, that lie has found that it doesn't pay to go. The inside.

And speaking of exams brings to mind that the boys at Harvard who report the news say that they have heard about the fatigue stage when one's spirits just begin to go flat. Well, he's in for one big thing this spring.

It seems that the said faculty was for a la carte service at any time. Good food, good music and good company. Dinner, $1.50-$2.50-

Papers have been chosen for the final competition. After preliminary judging and elimination in the various societies of the Combined Professional Societies. The winner of the Electrical Society competition was E. H. M. Danielson, with "Thermodyne and Cold." The prize being $50.

Richard X. Kommer, who presided at the meeting, said that he had heard it from various sources, that after much consideration, it was decided to hold a competition to see which the papers might be presented an annual prize.

One paper has been chosen for the final competition. A paper on "Thermal and Chemical Properties of X-rays," presented by Dr. E. R. Herrick, and called "An Introduction to the Quantum Theory." The mining society paper is on "Iron Ore Reserves," and will be given by Gerald E. Gilfrich, '32.

The prizes will be divided among the three best papers offered; the first prize being $50.

There was a rumor that some of the members, including Richard X. Kommer, have written a letter to the faculty asking that the Lounger be allowed to continue. The Lounger says it is true that the faculty has not yet issued any official statement on the matter. But it is generally believed that the Lounger will be allowed to continue.
