CANDIDATES SHOW SIGNS OF POWER IN CROSS-COUNTRY

Excellent Records Behind Many of Freshman—Form Tried at T.C.A. Camp

MANY ARE ALREADY OUT

Candidates for the Field Day relay team and the cross-country team for the Freshman class have begun to practice under the guidance of Coach Oscar Beldin. The keystone camp uncovered many men with遗传 potential for all of the events. The high scorer for the track meet at Camp was a New York boy named Hall. He is credited as having made up his mind to go out for freshman cross-country.

Many other men showed up well in the competition at camp, but at Stow was too much available. It was difficult to do much more compared the man with each other. Their real ability will be discovered later on Track Field as the season progresses.

Ask Freshmen To Begin Field Day Training Now

All freshmen with running ability should present themselves immediately at the track house at Oscar Beldin, track coach, if they desire to run on the relay team competing on Field Day, or on the regular freshman cross-country team. Practices are now going on and, men for either sport, unless they start prac- ticing as soon as possible, will find themselves handicapped. Field Day will take place October 30, and the first cross-country event is slated for October 18, so it is certain that there is a little enough time now, for those who wish to get in on the fun.

FACULTY ASSIGN FIELD DAY DATE AT MEETING

At its first meeting of the year the Faculty Club set October 30 as the date upon which Field Day is to be held. This day will be devoted to the annual battle of the class nomenclata to which the Sophomores and freshmen will endeavor to show each other the trend of the world. The executive business of the club was cleared up and plans were made for the more important meeting to be held the third Wednesday of this month.

INSTITUTE COMMITTEE HOLDS FIRST MEETING

FRESHMEN PREPARING FOR ANNUAL THREE-DAY OUTING AT MASSAPOAG

Seven Freshmen Report For Crew

Crewed from Page One

s men, was sent out with in full equip- with a steady breeze at their back. Four Yankee boats went out last evening, accompanied by the grey launch of the Junior varsity. The varsity crew of last year, with almost no changes in the lineup, rowed out, in a leaguer, to unfold long unused muscles in order to get in shape for the full competitions and the spring season.

A new feature in the crews of this fall is the presence of a Sophomore coxswain and five-oared crew. In addi- tion there was the regular Fifty crew and the Junior var- iety. The latter seemed determined to give the members of the varsity a good race for their position this fall.

SQUASH TEAM IS NOW RECOGNIZED BY M. I. T.

Coach Simmons announced yesterday that thorough the efforts of Dr. A. A. Brown, W., Dr. A. J. Rockwell '96, and Dr. H. E. Warriner '97, of the Advisory Council on Athletics, squash is now a recognized sport at Technology. Members of the varsity team may now receive their letters and will no longer have to pay their own traveling expenses.

At Williams College, students taking any of the chemical courses are allowed to analyze waxes in the labora- tories. It is understood that this is not done here because our chemistry depart- ment has no laboratory, and the students are not able to handle the action of various chemicals.
