INDOOR ACTIVITIES LOW

Students in athletics, publications and other activities are averaging considerably higher than the general scholastic average of the undergraduates, a body of the academic record of students at Technology shows. This study, based on marks of June, 1931, has just been compiled by Dean H. B. Loddell and Registrar Joseph C. MacKinnon.

The 372 men engaged in athletics, publications or managers and editors were above the general scholastic average. This study also shows that the standing of 265 men holding managerial and executive positions in athletics surpassed that of 393 younger men on the staffs of the various activities.
