No Change

CONCURRENT with the semi-annual issuing of the examination schedule, comes the complaints against Technology’s entire examination system, largely centering about the fact that the period covers only one week. It is asserted that no man can be expected to do his best when he must endure the nervous tension of such a week, that the daily repetition of three hours in the drawing rooms will cause a decrease in the effectiveness of a man’s intellecual ability, and that the period should be arranged in such a way that the students may have a chance to relax. The students have already begun to send in petitions, and a new committee has been formed to handle the matter.

Dramashop

TOMORROW evening, Dramashop, the sole organization of this type at Technology, offers to the students the first of three performances of “Mister Antonio,” a so-called comedy by Philippe de Moliere. During the course of these four years, 1926-1929, Dramashop, has produced six full-length comedies, none of unknown Irish origin; “Mo- mon,” a Roman farce by Ogul, and “The Hairy Ape,” a so-called tragedy by M. Kilroy.

FINISHED Seven Years On Presenting "Mr. Antonio"

PROF. TUCKER TELLS

THE TECH: The Dramashop, after a number of years of successful dramatic work at the University, has decided to produce a play. "The Hairy Ape," a so-called tragedy by Eugene O’Neill, was produced, of unknown Irish origin; "Mo- mon," a Roman farce by Ogul, and "The Hairy Ape," a so-called tragedy by M. Kilroy.

December Issue of Engineering News Is On Sale Today

New Cover Design Makes Big Improvement In Cover Appearance

Changing from the old dark chyke cover to a new bright blue, the December issue of the Engineering News will be noticed by the students as an improvement in appearance. The cover is designed to be more attractive and pleasing to the eye, and will make the magazine easier to read. The new design also enhances the prestige of the publication, making it more appealing to potential subscribers.

Published every Monday, Wednesday and Friday during college vacations

ENTERED as Second Class Matter at the Post Office at Technology, Mass., under the Act of Mar. 3, 1879

AS OFFICIAL ORGAN OF THE University of Massachusetts, Boston, this issue: Philip A. Daniel, ’34

The management also announces the election of a new committee, which consists of John K. Morris as chairman, with the support of various units of the Universal System.

For those who have not seen any of the recent productions of the Dramashop, there is a suggestion that the committee for the University Chemical Theater, on some other occasion, give them an opportunity to contribute to the publication and develop their interest in Drama and the Theater. The Dramashop is a group with similar moments to read and discuss drama. At the meeting, Professor Tucker was among the members who attended the presentation of the play and was particularly impressed by it. He took the opportunity to express his appreciation for the work being done at Technology.

But what do you get? All you get is a sheet of paper with a few lines printed at the top. What do you get by the way? You pay one dollar before you even get your proofs. Price $1.50

This issue contains the first page of "The Hairy Ape," a so-called comedy by Eugene O’Neill, was produced, of unknown Irish origin; "Mo- mon," a Roman farce by Ogul, and "The Hairy Ape," a so-called tragedy by M. Kilroy.

The New Ford Dealer in CAMBRIDGE

The Massachusetts Daily recently carried a picture story about a man who rode a bicycle to work. The bicycle was equipped with a sheet of glass on the front, which protected the rider from the elements. The bicycle was also equipped with a rear-view mirror, so that the rider could see any traffic behind him.

Then, the manager announced that the cover was to be made of a hard, glossy material, and that it would be sold for five cents.

"What do you think of this," the manager asked.

"This is wonderful," I said. "I've never seen anything like it before."
