optional military science?

the motion made at the last meeting of the Institute Committee that
Military Science courses be made optional with the student is appar-
ently the result of a desire in Which a noteworthy number of students
have expressed a desire to see the present arrangement modified.

A considerable number of students have expressed a desire to see
the present arrangement modified. A considerable number of students
have expressed a desire to see the present arrangement modified.

An examination of the list of students who have expressed a desire
to see the present arrangement modified indicates that a consider-
able number of students have expressed a desire to see the present
arrangement modified. An examination of the list of students who have
expressed a desire to see the present arrangement modified indicates
that a considerable number of students have expressed a desire to see
the present arrangement modified.

The motion made at the last meeting of the Institute Committee that
Military Science courses be made optional with the student is appar-
ently the result of a desire in Which a noteworthy number of students
have expressed a desire to see the present arrangement modified.

In this case, there has been a significant change in the number of
students who have expressed a desire to see the present arrangement
modified. It appears that the Motion made at the last meeting of the
Institute Committee that Military Science courses be made optional
with the student is apparently the result of a desire in Which a

party" that is organized by their liaisons, as it evidently was.

Lydia Lee - Luncheon

Opening Address by the School's Dean

TO THE EDITORS OF THE TECH:

May I take exception to your editorial of January 4? I may not have fully appreciated the
meaning of your remarks, but in any case I cannot agree with the implication that the
Institute harbored the belief that the actions of the Junior Prom Committee were un-
reasonable.

I simply intended to distinguish between
certain events, such as Senior Week, where all financial responsibilities
rest with the class treasury, and the Prom, which has all financial responsi-
bility for the class treasury.

Lookout Over Fifty Years

THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY

CATERING to public tastes through conventionalities is one thing; catering to the public, to what it gets in another. Some years ago, in an attempt to create a new style of journalism, the New York "Voo Doo" made its appearance, and for a time it was a success, as distinct from being epoch-making. But the public liked it, and so it continued to exist. Since that time practically every magazine has tried to ape the "Voo Doo" approach, but has been generally unsuccessful. As compared with college publications, the "Voo Doo" style will be found to be too much of a parabolic reflector. Whereas in the "Voo Doo" style, the sound is allowed to escape from this reflector in one direction only, in the present style of journalism, the sound is allowed to escape in a number of directions, and the result is that the "Voo Doo" style is a necessary part of a man's education.

The National Broadcasting Company has made a three-year contract for exclusive broadcasting of all professional basketball games. In the interest of broadcasting, three prominent experts have been engaged to study the problem of broadcasting basketball games. Inasmuch as the contract is for three years, N. B. C. expects to have an abundant supply of material for its programs. The subjects covered will include the history of basketball, the development of the game, the conditions under which it is played, and the history of the various professional basketball teams.

Five important engineering studies have been taken during the past year, each of which is important in its own right. One study is the transmission of radio programs, another the transmission of television programs, and the third the study of transmission of speech by the use of new long-band radio conditions, and the study of television.

The improved wire transmission of network programs is a matter which is being studied with great interest. In a perfect paul, a solid line is the most efficient and the most economical. But the public, as it were, may feel that it is not content to the extent that it may not be recognized, but it is distinctly a matter of a parabolic reflector.

"The parabolic microphone, sometimes known as the "Voo Doo" microphone, is one of the most important engineering developments of recent years. The "Voo Doo" microphone differs from the normal sound microphone in that it uses the principle of a parabolic reflector, whereas in the former the sound is first focused on the microphone by means of a parabolic reflector.

The "Voo Doo" microphone is a necessary part of a man's education. Inasmuch as the "Voo Doo" microphone is a necessary part of a man's education, the "Voo Doo" style is a necessary part of a man's education.

The "Voo Doo" style is a necessary part of a man's education. Inasmuch as the "Voo Doo" style is a necessary part of a man's education, the "Voo Doo" style is a necessary part of a man's education.

The "Voo Doo" style is a necessary part of a man's education. Inasmuch as the "Voo Doo" style is a necessary part of a man's education, the "Voo Doo" style is a necessary part of a man's education.

The "Voo Doo" style is a necessary part of a man's education. Inasmuch as the "Voo Doo" style is a necessary part of a man's education, the "Voo Doo" style is a necessary part of a man's education.

The "Voo Doo" style is a necessary part of a man's education. Inasmuch as the "Voo Doo" style is a necessary part of a man's education, the "Voo Doo" style is a necessary part of a man's education.

The "Voo Doo" style is a necessary part of a man's education. Inasmuch as the "Voo Doo" style is a necessary part of a man's education, the "Voo Doo" style is a necessary part of a man's education.
